## **SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION**

**VENTILATION** TO BE USED:

Provide adequate exhaust ventilation (general and / or local) if necessary to meet exposure requirements. Local exhaust ventilation is preferred to minimize dispersion of smoke and fumes into the work area.

Respiratory Protection: When ventilation is not sufficient to remove fumes from the breathing zone, a safety approved respirator

or self-contained breathing apparatus should be worn.

Protective Gloves: Wear rubber or cloth gloves to avoid skin

Eye Protection:

Safety glasses or goggles should be used.

## **SECTION 11 - TOXICOLOGICAL INFORMATION**

EXPOSURE LIMITS: Not determined for the product. See Section 2 for ingredients

Rosin is an allergen. Prolonged or repeated exposure to fumes during soldering may result in allergic reaction in a sensitive person, resulting in eye and skin irritation and asthma symptoms. Lead can accumulate in bone and body organs, and elimination from the body is slow. Medical examinations are advised for persons repeatedly exposed to levels above the exposure limit for lead. Lead is classified as a Group 2B carcinogen by the International Agency for Research on Cancer (IARC) and the U.S. Environmental Protection Agency (EPA). Women of child-bearing age should avoid chronic exposure to lead because of possible effects on reproduction and potential injury to a developing fetus.

## **SECTION 12 - ECOLOGICAL INFORMATION**

Keep out of waterways.

## **SECTION 13 - DISPOSAL CONSIDERATIONS**

Waste Disposal Methods:

Solder paste can be melted to reclaim the solder metal. Containers and extracted flux are hazardous waste if the solder containe lead.

CAUTION: Empty containers may contain product residue. Observe all label precautions.
