

769 LUBRICANT®

LUBRICANT & PENETRANT

DESCRIPTION

769 LUBRICANT® is the foremost penetrating, moisture displacing, lubricating and corrosion preventative available today. Unequalled where salt water, salt spray, or other harsh environments are encountered. **769 LUBRICANT** gives total performance while being environmentally safe, easy to use and nonflammable.

Lubricates: Contains ashless extreme pressure additives and highly refined lubricating oils that provide superior lubricating protection and anti-wear properties.

Penetrates: Rusted and frozen metal parts - studs, nuts, screws, pins, linkages - are easily loosened by means of superior "creepability."

Removes Moisture: Moisture is lifted and displaced rather than trapped. Pores and crevices of surfaces are freed from moisture and are coated with a thin nongreasy film that prevents additional moisture from clinging or entering.

Prevents Rust & Corrosion: Thin film adheres to metallic surfaces, providing positive, temporary protection against the formation of rust and corrosion, including electrolytic and galvanic corrosion common in salt environments.

- Nonflammable
- Nonevaporating
- Light machine oil base
- Contains no silicones
- Exempt from California VOC Reportings contains only LVP-VOC compounds
- Economical to use
- Contains no fluorocarbons
- Never hardens or dries out

APPLICATIONS

Industrial: May be used to free rusted or corroded fasteners on pumps, turbines, heat exchangers, reactors, manholes, electric motors, or any industrial equipment that operates in high humidity or salt exposure environments, such as those found in paper mills, refineries, petrochemical plants and shipyards.

Marine: Winches, shackle pins, toggle pins, pelican hooks, sheaves, swivels, capstans, digs, locks and door hinges, it dries out distributors, wiring harnesses, spark plugs, igniters and other ignition system parts. May be used on screws, nuts, bolts, studs, or any other fastener used to assemble marine equipment that is prone to rust or corrosion. Prevents saltwater corrosion of outboard motors. Excellent lubricant/preservative for nylon rope.

Automotive: Dries out wet ignition systems. May be used on door hinges, truck latches, door locks, exhaust systems or any nut, bolt, screw or fastener that is prone to "heat-freeze." Ideal for use on parts that are rusted or corroded as a result of exposure to road deicing salts.

Residential: For use throughout the home wherever a premium penetrating lubricant is desirable such as locks, chains, bikes, firearms, radio controlled vehicles, etc. On firearms, **769 LUBRICANT** is an excellent bore and barrel cleaner and preservative and doubles as an excellent lubricant to prevent freeze-up.
