Browne STF Load Check Indicators are not considered to be hazardous products according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200 and the Controlled Products Regulations.

Browne STF Load Check Indicators contain two sources of protein, lipids and polysaccharides (derived from eggs and porcine) and contain no blood products.

Health and Safety:

The Browne STF Load Check Indicators are designed to be used to monitor the cleaning efficacy of surgical instrument washer-disinfector machines. Use in any other processes may give misleading results.

Hands should be clean and dry when handling unprocessed indicators. Caution should be used when handling the indicators after processing as any residual may stain.

The Browne STF Load Check Indicators should be stored in unopened or resealed packages in cool (0-30°C) dry (30-60% RH) conditions away from sunlight.

SHIPPING INFORMATION: Non-Hazardous.

The information on this sheet is not a specification and does not guarantee specific properties. The information is intended to provide general knowledge as to health and safety based upon our knowledge of the handling, storage and use of the product. It is not applicable to unusual or non-standard uses of the product or where instruction or recommendations are not followed.
