VI. HEALTH HAZARD DATA

Physical Contact	Effects of Overexposure	Suggest First Aid	Precautionary Info
Eye	Liquid can cause slight, temporary irritation with slight temporary corneal injury. Vapors can irritate eyes.	Flush eyes for at least 15 (fifteen) minutes with clear water. If irritation persists, seek medical attention.	Avoid eye contact.
Skin	Prolonged or repeated contact with liquid can cause freezing of skin tissues, defatting, or dermatitis.	Wash with soap and water. For frostbite, seek immediate medical attention.	Avoid prolonged skin contact.
Inhalation	Major potential rout of exposure. Minimal effects observed below 1000 ppm. Dizziness, drowsiness, and throat irritation possible at levels above 1000 ppm. Unconsciousness and death at levels above 10,000 ppm. Blood pressure depression, cardiac sensitization, and ventricular arrhythmia can result from exposure to near-anesthetic levels.	Remove to fresh air. If breathing has stopped, administer artificial respiration. Seek medical attention.	Avoid breathing of vapors. Use in well ventilated areas.

Ingestion	Single dose toxicity is low to moderate. If vomiting occurs the liquid can be aspirated into the lungs, which can cause chemical pneumonia and systemic effects. Human psychotropic, gastrointestinal, and central nervous system effects possible.	Adrenalin and other similar cardiac stimulants should NOT be used to treat effects of overexposure to this product.	Product is not intended to be taken internally.

VII. EMPLOYEE PROTECTION

Respiratory Protection:	If levels exceed TLVs, increased ventilation or organize vapor mask required.
