#### **SECTION 4 FIRST AID MEASURES**

NZ Poisons Centre 0800 POISON (0800 764 766) | NZ Emergency Services: 111

# Description of first aid measures

| Eye Contact  | If this product comes in contact with eyes:  Wash out immediately with water.  If irritation continues, seek medical attention.  Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|--------------|--|
| Skin Contact | If skin or hair contact occurs:  ▶ Flush skin and hair with running water (and soap if available).  ▶ Seek medical attention in event of irritation.   |
| Inhalation   | <ul> <li>If fumes, aerosols or combustion products are inhaled remove from contaminated area.</li> <li>Other measures are usually unnecessary.</li> </ul>  |
| Ingestion    | <ul> <li>Immediately give a glass of water.</li> <li>First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.</li> </ul>  |

# Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## **SECTION 5 FIREFIGHTING MEASURES**

# Extinguishing media

▶ There is no restriction on the type of extinguisher which may be used.

#### Special hazards arising from the substrate or mixture

Fire Incompatibility

None known.

# Advice for firefighters

| Fire Fighting         | Use water delivered as a fine spray to control fire and cool adjacent area. |
|-----------------------|---|
| Fire/Explosion Hazard | ► Non combustible.  |

# **SECTION 6 ACCIDENTAL RELEASE MEASURES**

#### Personal precautions, protective equipment and emergency procedures

| Minor Spills | ▶ Clean up all spills immediately.  |  |
|--------------|---|--|
| Major Spills | ▶ Clear area of personnel and move upwind.                                  |  |
|              |   |  |
|              | Personal Protective Equipment advice is contained in Section 8 of the MSDS. |  |

# **SECTION 7 HANDLING AND STORAGE**

# Precautions for safe handling

| Safe handling     | ▶ Limit all unnecessary personal contact. |
|-------------------|---|
| Other information |   |

# Conditions for safe storage, including any incompatibilities

| Suitable container      | ▶ Polyethylene or polypropylene container.              |
|-------------------------|---|
| Storage incompatibility | Avoid contamination of water, foodstuffs, feed or seed. |

Version No: **1.4** Page **3** of **6** Issue Date: **24/03/2015**

| RESENE CONCRETE<br>BLOCK SEALER | Not Available | Not Available |

#### **Exposure controls**

| Appropriate engineering controls | Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. |  |
|----------------------------------|--|--|
| Personal protection              |  |  |
| Eye and face protection          | <ul> <li>Safety glasses with side shields</li> <li>Chemical goggles.</li> </ul>                        |  |
| Skin protection                  | See Hand protection below  |  |
| Hands/feet protection            | Wear general protective gloves, eg. light weight rubber gloves.  |  |
| Body protection                  | See Other protection below   |  |
| Other protection                 | No special equipment needed when handling small quantities.  |  |
| Thermal hazards                  | Not Available  |  |

## Recommended material(s)

# GLOVE SELECTION INDEX

Glove selection is based on a modified presentation of the:

# "Forsberg Clothing Performance Index".

The effect(s) of the following substance(s) are taken into account in the *computer-generated* selection:

RESENE CONCRETE BLOCK SEALER

| Material       | СРІ |
|----------------|-----|
| BUTYL          | С   |
| NATURAL RUBBER | С   |
| NEOPRENE       | С   |
| PE/EVAL/PE     | С   |
| PVA            | С   |
| VITON          | С   |

<sup>\*</sup> CPI - Chemwatch Performance Index

A: Best Selection

B: Satisfactory; may degrade after 4 hours continuous immersion

C: Poor to Dangerous Choice for other than short term immersion

**NOTE**: As a series of factors will influence the actual performance of the glove, a final selection must be based on detailed observation. -

#### Respiratory protection

Type A-P Filter of sufficient capacity.

Where the concentration of gas/particulates in the breathing zone, approaches or exceeds the "Exposure Standard" (or ES), respiratory protection is required.

Degree of protection varies with both face-piece and Class of filter; the nature of protection varies with Type of filter.

| Required Minimum<br>Protection Factor | Half-Face<br>Respirator | Full-Face<br>Respirator | Powered Air<br>Respirator  |
|---------------------------------------|-------------------------|-------------------------|----------------------------|
| up to 5 x ES                          | A-AUS / Class 1<br>P2   | -                       | A-PAPR-AUS /<br>Class 1 P2 |
| up to 25 x ES                         | Air-line*               | A-2 P2                  | A-PAPR-2 P2                |
| up to 50 x ES                         | -                       | A-3 P2                  | -                          |
| 50+ x ES                              | -                       | Air-line**              | -                          |

<sup>\* -</sup> Continuous-flow; \*\* - Continuous-flow or positive pressure demand

A(All classes) = Organic vapours, B AUS or B1 = Acid gasses, B2 = Acid gas or hydrogen cyanide(HCN), B3 = Acid gas or hydrogen cyanide(HCN), E = Sulfur dioxide(SO2), G = Agricultural chemicals, K = Ammonia(NH3), Hg = Mercury, NO = Oxides of nitrogen, MB = Methyl bromide, AX = Low boiling point organic compounds(below 65 degC)

# **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

## Information on basic physical and chemical properties

| iniormation on basic phys | ical and chemical properties |  |               |
|---------------------------|------------------------------|--|---------------|
| Appearance                | Turbid liquid                |  |               |
|                           |                              |  |               |
| Physical state            | Liquid                       | Relative density (Water = 1)               | 1.64          |
| Odour                     | Not Available                | Partition coefficient<br>n-octanol / water | Not Available |

Print Date: 24/03/2015

<sup>\*</sup> Where the glove is to be used on a short term, casual or infrequent basis, factors such as "feel" or convenience (e.g. disposability), may dictate a choice of gloves which might otherwise be unsuitable following long-term or frequent use. A qualified practitioner should be consulted.

| Vapour pressure (kPa)                        | Not Available | Gas group                        | Not Available |
| Solubility in water (g/L)                    | Miscible      | pH as a solution                 | Not Available |
| Vapour density (Air = 1)                     | Not Available | VOC g/L                          | 2             |

# **SECTION 10 STABILITY AND REACTIVITY**

| Reactivity                         | See section 7   |
|------------------------------------|---|
| Chemical stability                 | Product is considered stable and hazardous polymerisation will not occur. |
| Possibility of hazardous reactions | See section 7   |
| Conditions to avoid                | See section 7   |
| Incompatible materials             | See section 7   |
| Hazardous decomposition products   | See section 5   |

# **SECTION 11 TOXICOLOGICAL INFORMATION**

| Inhaled      | The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models).   |
|--------------|--|
| Ingestion    | The material has NOT been classified by EC Directives or other classification systems as "harmful by ingestion".   |
| Skin Contact | The material is not thought to produce adverse health effects or skin irritation following contact (as classified by EC Directives using animal models).   |
| Eye          | Although the liquid is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).               |
| Chronic      | Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course. |

# **SECTION 16 OTHER INFORMATION**

# Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

A list of reference resources used to assist the committee may be found at:

www.chemwatch.net/references

The (M)SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
