\* ACGIH - LISTED AS SIMPLE ASPHYXIANT (See Section III)

**Hazardous Material Identification System (HMIS):** Health - 1, Flammability - 4, Reactivity - 0  
**Not a Controlled Product under (WHMIS) - Canada** **Special Protection: See Section 9**

### Section 3 - Health Hazard Data

**Threshold Limit Value** PEL Heptane - 400 ppm, Propane - 1000 ppm, TLV for oil mist = 5mg/m<sup>3</sup>  
PEL Acetone - 750 ppm

**Effects of Overexposure:** Inhalation is the most likely method of exposure. Minimal effects are expected at levels below the TLV of components. Dizziness, drowsiness, coughing, nasal or throat irritations at higher levels. LPG may act as a simple asphyxiant without other significant physiologic effects if the oxygen content is low. It is reported that overexposure can cause liver abnormalities, kidney, lung and spleen damage in test animals.

**Carcinogenicity:** NTP? No IARC Monographs? No OSHA Regulated? No

### Section 4 - Emergency and First Aid Procedures

**EYE CONTACT:** Flush with clear water for 15 minutes or until irritation subsides. If irritation persists, consult a physician.

**SKIN CONTACT:** Remove any contaminated clothing and wash with soap and warm water.

**INHALATION:** Remove to fresh air. If breathing has stopped, administer artificial respiration. Get medical help immediately.

**INGESTION:** If ingested, call a physician immediately. Do not induce vomiting.

### Section 5 - Fire and Explosion Hazard Data

**Flash Point (Method Used):** Propellant <0°F **Flammable Limits:** LEL 0.9% UEL 9.5%

**Extinguishing Media:** Foam, Dry Chemical, and Carbon Dioxide

**Special Fire Fighting Procedures:** Keep containers cool. Use air-supplied breathing equipment for enclosed or confined spaces. Use shielding to protect personnel against bursting containers.

**Unusual Fire and Explosion Hazards:** Do not spray near open flame. At elevated temperatures (over 130°F.), aerosol containers may vent, burst, or rupture.
