

**MWI#035675 Autoclave Foam Cleaner 22oz.**

A long-lasting conditioning foam spray for easy cleaning and deodorizing of your autoclave. The non-aerosol makeup is environmentally friendly and rinses freely leaving a residue free surface. It can also be used on stainless steel carts, trays and high quality instruments. Elimination of any unpleasant odors is also a great feature.

**NOTE: Contains phosphoric acid which can cause burning – please use caution and wear appropriate protective gloves, eye protection and protective clothing. Must be shipped by Ground delivery.**

If you have questions or comments regarding this product please call 1-877-266-3349 or email [repairs@securos.com](mailto:repairs@securos.com).

*\*MSDS information available on SECUROS Surgical Instrument Care page.*

**Instructions:**

*For autoclave cleaning, conditioning and deodorization:* Walls of autoclave must be cool. Spray the Autoclave Foam Cleaner liberally onto inside walls of autoclave. Allow to remain wet for 15-30 minutes. Brushing with non-metallic brush will speed the action. Rinse walls with copious amounts of water.

*For stainless steel instruments, carts and trays:* Spray the Autoclave Foam Cleaner liberally onto surfaces. Allow to remain wet for 15-30 minutes. Brushing with non-metallic brush will speed the action. Rinse cart or tray with copious amounts of water. Can also be used on high quality stainless steel instruments.

**Cautions & Warnings:** Use of gloves and eye protection is highly recommended.
