# **SAFETY DATA SHEET**

Date of issue/Date of revision30 September 2016Version 5

| Section 1. Identification        |   |
|----------------------------------|---|
| Product name                     | : PALE BROWN  |
| Product code                     | : 852   |
| Other means of identification    | : Not available.  |
| Product type                     | : Liquid.   |
| Relevant identified uses of t    | the substance or mixture and uses advised against                               |
| Product use                      | : Industrial applications.  |
| Use of the substance/<br>mixture | : Coating. Paints. Painting-related materials.                                  |
| Uses advised against             | : Not applicable.   |
| Manufacturer                     | : PPG Industries, Inc.<br>One PPG Place,<br>Pittsburgh, PA 15272                |
| Emergency telephone<br>number    | : (412) 434-4515 (U.S.)<br>(514) 645-1320 (Canada)<br>01-800-00-21-400 (Mexico) |
| Technical Phone Number           | : (740) 363-9610 (DELAWARE, OH) 8:00 a.m 5:00 p.m. EST                          |

## Section 2. Hazards identification

| OSHA/HCS status                            | <ul> <li>This material is considered hazardous by the OSHA Hazard Communication Standard<br/>(29 CFR 1910.1200).</li> </ul>  |
|--|--|
| Classification of the substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>ACUTE TOXICITY (oral) - Category 4<br/>SKIN IRRITATION - Category 2<br/>EYE IRRITATION - Category 2A<br/>TOXIC TO REPRODUCTION (Unborn child) - Category 2<br/>Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 18.9%</li> </ul> |
| GHS label elements<br>Hazard pictograms    |  |
| Signal word                                | : Warning  |
|  | United States Page: 1/15   |

Product name PALE BROWN

## Section 2. Hazards identification

| Hazard statements Precautionary statements | <ul> <li>Fammable liquid and vapor.<br/>Harmful if swallowed.<br/>Causes serious eye irritation.<br/>Causes skin irritation.<br/>Suspected of damaging the unborn child.</li> </ul>   |
|--|---|
|  |   |
| Prevention                                 | Description: De |
| Response                                   | <ul> <li>F exposed or concerned: Get medical attention. IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. Photosensitive agents : In case of accidental eye contact, avoid concurrent exposure to the sun or other sources of UV light which may increase the sensitivity of the eyes. In case of accidental skin contact, avoid concurrent exposure to the sun or other sources of UV light which may increase the sensitivity of the sources of UV light which may increase the sensitivity of skin.</li> </ul>  |
| Storage                                    | : Store locked up. Store in a well-ventilated place. Keep cool.   |
| Disposal                                   | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>   |
| Supplemental label<br>elements             | : Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.  |
| Hazards not otherwise classified           | : Prolonged or repeated contact may dry skin and cause irritation.  |

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture    |
|-------------------|--------------|
| Product name      | : PALE BROWN |

| Ingredient name                                | %           | CAS number |
|--|-------------|------------|
| 2-butoxyethanol                                | ≥20 - ≤28   | 111-76-2   |
| Naphtha (petroleum), hydrotreated heavy        | ≥5.0 - ≤11  | 64742-48-9 |
| 2-(2-ethoxyethoxy)ethanol                      | ≥5.0 - ≤10  | 111-90-0   |
| Talc , not containing asbestiform fibres       | ≥5.0 - ≤8.3 | 14807-96-6 |
| 2-(2-butoxyethoxy)ethanol                      | ≥1.0 - ≤5.0 | 112-34-5   |
| oxirane, mono[(C12-14-alkyloxy)methyl] derivs. | <1.0        | 68609-97-2 |
| toluene  | <1.0        | 108-88-3   |

SUB codes represent substances without registered CAS Numbers.

Product name PALE BROWN

### Section 3. Composition/information on ingredients

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person. **Description of necessary first aid measures** 

| Eye contact  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> <li>In case of accidental eye contact, avoid concurrent exposure to the sun or other<br/>sources of UV light which may increase the sensitivity of the eyes.</li> </ul> |
|--------------|---|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognized skin cleanser. Do NOT use solvents or thinners.<br/>In case of accidental skin contact, avoid concurrent exposure to the sun or other<br/>sources of UV light which may increase the sensitivity of skin.</li> </ul>              |
| Ingestion    | : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.   |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |   |  |
|--------------------------------|---|--|
| Eye contact :                  | Causes serious eye irritation.  |  |
| Inhalation :                   | No known significant effects or critical hazards.   |  |
| Skin contact :                 | Causes skin irritation. Defatting to the skin.  |  |
| Ingestion :                    | Harmful if swallowed.   |  |
| Over-exposure signs/symptoms   |   |  |
| Eye contact :                  | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness                                  |  |
| Inhalation :                   | Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |  |

Product name PALE BROWN

#### Section 4. First aid measures Skin contact : Adverse symptoms may include the following: irritation redness dryness cracking reduced fetal weight increase in fetal deaths skeletal malformations Ingestion : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations Indication of immediate medical attention and special treatment needed, if necessary Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. **Specific treatments** : No specific treatment. **Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                     |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

Product name PALE BROWN

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.  |
|--------------------------------|--|
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| Precautions for safe handling |  |
|-------------------------------|--|
| Protective measures :         | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in eyes<br>or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do<br>not enter storage areas and confined spaces unless adequately ventilated. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Store and use away from heat, sparks, open flame or<br>any other ignition source. Use explosion-proof electrical (ventilating, lighting and<br>material handling) equipment. Use only non-sparking tools. Take precautionary<br>measures against electrostatic discharges. Empty containers retain product residue<br>and can be hazardous. Do not reuse container. |

Product name PALE BROWN

## Section 7. Handling and storage

| Special precautions  | : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.   |
|--|---|
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Do not store above the following temperature: 35°C (95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                               | Exposure limits                                    |  |
|---|--|--|
| 2-butoxyethanol                               | ACGIH TLV (United States, 3/2015).                 |  |
|   | TWA: 20 ppm 8 hours.                               |  |
|   | OSHA PEL (United States, 2/2013).                  |  |
|   | Absorbed through skin.                             |  |
|   | TWA: 240 mg/m <sup>3</sup> 8 hours.                |  |
|   | TWA: 50 ppm 8 hours.                               |  |
| Japhtha (petroleum), hydrotreated heavy       | None.  |  |
| -(2-ethoxyethoxy)ethanol                      | IPEL (PPG).  |  |
|   | TWA: 25 ppm  |  |
|   | STEL: 125 ppm                                      |  |
| alc , not containing asbestiform fibres       | ACGIH TLV (United States, 3/2015).                 |  |
|   | TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Respirable |  |
|   | fraction   |  |
|   | OSHA PEL Z3 (United States, 2/2013).               |  |
|   | TWA: 20 mppcf 8 hours. Form: not                   |  |
|   | containing asbestos                                |  |
| 2-(2-butoxyethoxy)ethanol                     | ACGIH TLV (United States, 3/2015).                 |  |
|   | TWA: 10 ppm 8 hours. Form: Inhalable               |  |
|   | fraction and vapor                                 |  |
| xirane, mono[(C12-14-alkyloxy)methyl] derivs. | None.  |  |
| bluene  | OSHA PEL Z2 (United States, 2/2013).               |  |
| Jidene  | AMP: 500 ppm 10 minutes.                           |  |
|   | CEIL: 300 ppm                                      |  |
|   | TWA: 200 ppm 8 hours.                              |  |
|   | ACGIH TLV (United States, 3/2015).                 |  |
|   | TWA: 20 ppm 8 hours.                               |  |

| <b>.</b> . |  |      |   |

#### Consult local authorities for acceptable exposure limits.

| Recommended monitoring procedures      | :          | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness of<br>the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring standards.<br>Reference to national guidance documents for methods for the determination of<br>hazardous substances will also be required.  |
|--|------------|--|
| Appropriate engineering controls       | :          | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Environmental exposure controls        | :          | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measur           | <u>'es</u> |  |
| Hygiene measures                       | :          | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection<br>Skin protection | :          | Chemical splash goggles.   |
| Hand protection                        | :          | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Gloves                                 | ÷          | polyethylene   |
| Body protection                        | :          | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection                  | -          | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
|  |            | United States Page: 7/15   |

Product name PALE BROWN

## Section 8. Exposure controls/personal protection

| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |
|------------------------|--|
|                        |  |

## Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |  |
|--|---|--|
| Physical state                               | Liquid.   |  |
| Color  | Not available.                                    |  |
| Odor   | Not available.                                    |  |
| Odor threshold                               | Not available.                                    |  |
| рН   | Not available.                                    |  |
| Melting point                                | Not available.                                    |  |
| Boiling point                                | >37.78°C (>100°F)                                 |  |
| Flash point                                  | Closed cup: 38°C (100.4°F)                        |  |
| Auto-ignition temperature                    | Not available.                                    |  |
| Decomposition temperature                    | Not available.                                    |  |
| Flammability (solid, gas)                    | Not available.                                    |  |

## Section 10. Stability and reactivity

|                                    | United States Page: 8/15   |
|------------------------------------|--|
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.            |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.            |
| Chemical stability                 | : The product is stable.   |
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients. |

Product name PALE BROWN

## Section 10. Stability and reactivity

Refer to protective measures listed in sections 7 and 8.

| Incompatible materials           | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
|----------------------------------|---|--|
| Hazardous decomposition products | : | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |
|                                  | _ |  |

| Eye contact :               | Causes serious eye irritation.  |
|-----------------------------|---|
| Inhalation :                | No known significant effects or critical hazards.                             |
| Skin contact :              | Causes skin irritation. Defatting to the skin.                                |
| Ingestion :                 | Harmful if swallowed.   |
| Over-exposure signs/symptor | <u>ns</u>   |
| Eye contact :               | Adverse symptoms may include the following:<br>pain or irritation<br>watering |

redness

Product name PALE BROWN

## Section 11. Toxicological information

| Inhalation                     | : Adverse symptoms may include the following:<br>reduced fetal weight  |
|--------------------------------|--|
|                                | increase in fetal deaths   |
|                                | skeletal malformations   |
| Skin contact                   | : Adverse symptoms may include the following:<br>irritation  |
|                                | redness  |
|                                | dryness  |
|                                | cracking   |
|                                | reduced fetal weight   |
|                                | increase in fetal deaths   |
| to see the se                  | skeletal malformations   |
| Ingestion                      | : Adverse symptoms may include the following:<br>reduced fetal weight  |
|                                | increase in fetal deaths   |
|                                | skeletal malformations   |
| Delayed and immediate effe     | cts and also chronic effects from short and long term exposure   |
| Conclusion/Summary             | : There are no data available on the mixture itself. Acrylate components of the mixture have irritating properties. Prolonged or repeated contact with skin or mucous        |
|                                | membrane may result in irritation symptoms, such as redness, blistering, dermatitis etc.   |
|                                | May cause allergic skin reactions with repeated exposure. The inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract. Ingestion may cause |
|                                | nausea, weakness and central nervous system effects. Exposure to component solvent   |
|                                | vapor concentrations in excess of the stated occupational exposure limit may result in   |
|                                | adverse health effects such as mucous membrane and respiratory system irritation and   |
|                                | adverse effects on the kidneys, liver and central nervous system. Symptoms and signs   |
|                                | include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by            |
|                                | absorption through the skin. There is some evidence that repeated exposure to organic  |
|                                | solvent vapors in combination with constant loud noise can cause greater hearing loss  |
|                                | than expected from exposure to noise alone. If splashed in the eyes, the liquid may  |
|                                | cause irritation and reversible damage. This takes into account, where known, delayed  |
|                                | and immediate effects and also chronic effects of components from short-term and long-<br>term exposure by oral, inhalation and dermal routes of exposure and eye contact.   |
| Short term exposure            | term exposure by oral, initialition and dermai routes of exposure and eye contact.   |
| Potential immediate            | : There are no data available on the mixture itself.   |
| effects                        |  |
| Potential delayed effects      | : There are no data available on the mixture itself.   |
| Long term exposure             |  |
| Potential immediate<br>effects | : There are no data available on the mixture itself.   |
| Potential delayed effects      | : There are no data available on the mixture itself.   |
| Potential chronic health eff   | <u>ects</u>  |
| General                        | <ul> <li>Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or<br/>dermatitis.</li> </ul>   |
| Carcinogenicity                | : No known significant effects or critical hazards.  |
| Mutagenicity                   | : No known significant effects or critical hazards.  |
| Teratogenicity                 | : Suspected of damaging the unborn child.  |
| <b>Developmental effects</b>   | : No known significant effects or critical hazards.  |

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact |
