Ventilate area of leak or spill. Wear appropriate personal protective equipment. In case of spill, vacuuming or wet sweeping may be used to avoid dust dispersal

7. HANDLING AND STORAGE

HANDLING AND STORAGE: Keep in a tightly closed container, stored in a cool, dry, ventilated area. Do not ingest. Do not breathe dust. Avoid contact with eyes. Keep away from incompatibles such as oxidizing agents, acids.

OTHER PRECAUTIONS: Good personal hygiene practices are suggested.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

VENTILATION: Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limits.

RESPIRATORY PROTECTION: If the exposure limit is exceeded and engineering controls are not feasible, a half facepiece particulate respirator (NIOSH type N95 or better filters) may be worn for up to ten times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier, whichever is lowest. For emergencies or instances where exposure levels are not known, use a full-facepiece positive pressure, air-supplied respirator.
