

# SAFETY DATA SHEET

### 1. Identification

Product identifier Powerhold 650 NE Patch Plus

Other means of identification

SDS number 14000550002
Synonyms Floor Patch
Recommended use Interior use.

**Recommended restrictions**Use in accordance with manufacturer's recommendations.

Manufacturer/Importer/Supplier/Distributor information

Company name Floor Covering Distributor Alliance

Address PO Box 7558

Ft. Worth, TX 76111

**Telephone** 1-844-874-3232 Technical Assistance

Website www.powerhold.com Emergency phone number 1 (800) 507-8899

## 2. Hazard(s) identification

Physical hazards Not classified.

Health Hazards Skin corrosion/irritation Category 2

Serious eye damage/eye irritation Category 1
Sensitization, skin Category 1
Carcinogenicity Category 1A

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Causes skin irritation. Causes serious eye damage. May cause an allergic skin reaction. May

cause cancer.

**Precautionary statement** 

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

and understood. Avoid breathing dust. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/protective clothing/eye

protection/face protection.

**Response** If exposed or concerned: Get medical advice/attention. If on skin: Wash with plenty of water/. If

skin irritation or rash occurs: Get medical advice/attention. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Immediately call a poison center/doctor. Take off contaminated clothing and wash before reuse.

Contaminated clothing should not be allowed out of the workplace.

Storage Store locked up.

**Disposal** Dispose of in accordance with local, state, and federal regulations.

Hazard(s) not otherwise

classified (HNOC)

None known.

Supplemental information

Not applicable.

# 3. Composition/information on ingredients

#### **Mixtures**

Powerhold 650 NE Patch Plus SDS US

923170 Version #: 01 Revision date: - Issue date: 09-October-2014

Chemical name	CAS number	%
Quartz (Sand)	14808-60-7	< 50
Limestone	1317-65-3	< 20
Calcium sulfate dihydrate (alternative CAS 10101-41-4)	13397-24-5	< 10
Plaster of Paris (Calcium Sulfate Hemihydrate CAS 10034-76-1)	26499-65-0	< 10
Portland Cement	65997-15-1	< 10
Perlite	93763-70-3	< 5

**Composition comments** 

All concentrations are in percent by weight unless ingredient is a gas.

## 4. First-aid measures

Inhalation Dust irritates the respiratory system, and may cause coughing and difficulties in breathing. Move

injured person into fresh air and keep person calm under observation. Get medical attention if

symptoms persist.

Skin contact Contact with wet or dry product: Wash area with cold running water immediately. Open sores or

cuts should be thoroughly flushed and covered with suitable dressings.

Dust in eyes: Flush with cold tap water for at least 15 minutes. If irritation persists, seek medical Eye contact

attention immediately.

Plaster of Paris hardens and if ingested may result in stomach and intestinal blockage. Drinking Ingestion

gelatin solutions or large volumes of water may delay setting. Get medical attention if symptoms

Dust may irritate throat and respiratory system and cause coughing. May cause serious chemical

burns to the skin. May cause chemical eye burns. Permanent eye damage including blindness

could result.

Most important symptoms/effects, acute and delayed

Indication of immediate medical attention and special

treatment needed

General information

Provide general supportive measures and treat symptomatically.

Ensure that medical personnel are aware of the material(s) involved.

## 5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing

media

Specific hazards arising from

the chemical

Special protective equipment and precautions for firefighters Use fire-extinguishing media appropriate for surrounding materials.

Not applicable.

Not a fire hazard.

Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in

Use standard firefighting procedures and consider the hazards of other involved materials.

case of fire.

Fire fighting equipment/instructions

Specific methods Cool material exposed to heat with water spray and remove it if no risk is involved.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

See Section 8 of the SDS for Personal Protective Equipment.

Methods and materials for containment and cleaning up Vacuum up the spilled material. Vacuums used for this purpose should be equipped with HEPA filters. Containers must be labeled. Collect in approved containers and seal securely. For waste

disposal, see Section 13 of the SDS.

**Environmental precautions** Avoid discharge to drains, sewers, and other water systems.

Powerhold 650 NE Patch Plus SDS US

## 7. Handling and storage

## Precautions for safe handling

Do not get in eyes and avoid contact with skin and clothing. Wear appropriate personal protective equipment (See Section 8). Avoid inhalation of dust. Minimize dust production when mixing, or opening and closing bags. Use with adequate dust control and local ventilation. Wear appropriate NIOSH respirator when ventilation is inadequate and occupational exposure limits are exceeded. Wash hands thoroughly after handling. Use a non-alkaline soap such as Neutralite Safety Solution or Mason's Hand Rinse.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well-ventilated place. Store away from incompatible materials. Avoid contact with acids, water, and moisture.

# 8. Exposure controls/personal protection

## Occupational exposure limits

### US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Туре	Value	Form
Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS	PEL	5 mg/m3	Respirable fraction.
13397-24-5)		15 mg/m3	Total dust.
Limestone (CAS 1317-65-3)	PEL	5 mg/m3	Respirable fraction.
		15 mg/m3	Total dust.

Quartz (Sand) (CAS 14808-60-7)	TWA	0.05 mg/m3	Respirable dust.

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Provide sufficient ventilation for operations causing dust formation. Observe occupational

exposure limits and minimize the risk of exposure.

Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear approved safety goggles.

Skin protection

**Hand protection** Wear appropriate chemical resistant gloves.

Other Wear long-sleeved shirts, pants and rubber boots.

limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Use a NIOSH/MSHA approved air purifying respirator as needed to control exposure. Consult with respirator manufacturer to determine respirator selection, use, and limitations. Use positive pressure, air-supplied respirator for uncontrolled releases or when air purifying respirator limitations may be exceeded. Follow respirator protection program requirements (OSHA 1910.134 and ANSI Z88.2) for all respirator

use.

Thermal hazards N

General hygiene considerations

During work avoid kneeling in fresh mortar or concrete wherever possible. If kneeling is absolutely necessary, then appropriate waterproof personal protective equipment must be worn. Do not eat, drink or smoke when working with cement to avoid contact with skin or mouth. Immediately after working with cement or cement-containing materials, workers should wash or shower. Remove contaminated clothing, footwear, watches, etc, and clean thoroughly before re-use.

### 9. Physical and chemical properties

**Appearance** 

Physical stateSolid.FormPowder.

## 10. Stability and reactivity

Not available. Reactivity

**Chemical stability** Material is stable under normal conditions. Possibility of hazardous Hazardous polymerization does not occur.

reactions

Conditions to avoid Contact with incompatible materials. Exposure to moisture. When mixed with water this product can become very hot. Encasing or making moulds of any body part can cause serious burns that

may require surgical removal of affected tissue and even amputation of encased body part. Incompatible materials

Acids. Exposure to water and acids must be supervised because the reactions are vigorous and produce large amounts of heat. Crystalline silica in contact with powerful oxidizing agents, such as fluorine, chlorine trifluoride and oxygen difluoride, may cause fires. Crystalline silica will dissolve in

hydrofluoric acid and produce a corrosive gas, silicon tetrafluoride.

**Hazardous decomposition** 

products

Calcium oxides. Sulfur oxides.

### 11. Toxicological information

#### Information on likely routes of exposure

Inhalation Inhalation of dusts may cause respiratory irritation. Prolonged and repeated exposure to airborne

respirable crystalline silica can cause silicosis and/or lung cancer.

Exposure to dry product may cause drying of the skin and mild irritation, or more significant Skin contact

effects from the aggravation of other conditions. Wet product is caustic (pH ≥ 12) and dermal exposure may cause more severe skin effects, including thickening, cracking or fissuring of the skin. Prolonged exposure can cause severe skin damage in the form of chemical (caustic) burns. Some individuals who are exposed to wet or dry product may exhibit an allergic response, which

can result in symptoms ranging from mild rashes to severe skin ulcers.

Exposure to airborne dust may cause immediate or delayed irritation of the eyes. Depending on Eye contact

the level of exposure, effects may range from redness to chemical burns and blindness.

Ingestion Ingestion may cause irritation and stomach discomfort.

Symptoms related to the physical, chemical and toxicological characteristics Dust may irritate throat and respiratory system and cause coughing. May cause serious chemical burns to the skin. May cause chemical eye burns. Permanent eye damage including blindness

could result.

## Information on toxicological effects

Powerhold 650 NE Patch Plus SDS US

Not expected to be a hazard under normal conditions of intended use. **Acute toxicity** 

Components **Species Test Results** 

Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS 13397-24-5)

Acute

Inhalation

LC50 Rat > 3.26 mg/l, 4 Hours

Oral

LD50 Rat > 1581 mg/kg

Skin corrosion/irritation Causes skin irritation.

Serious eve damage/eve

Causes serious eye damage.

irritation

Respiratory or skin sensitization

Respiratory sensitization Not classified but possible due to skin sensitization effect.

Skin sensitization Trace amounts of Cr(VI) compounds from Portland Cement may cause allergic skin reaction even

after one exposure.

Germ cell mutagenicity No data available to indicate product or any components present at greater than 0.1% are

mutagenic or genotoxic.

Repeated and prolonged exposures to high levels of respirable crystalline silica may cause Carcinogenicity

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Not listed.

Reproductive toxicity Not expected to be a reproductive hazard.

Specific target organ toxicity single exposure

No data available, but none expected.

Specific target organ toxicity -

Not classified. For detailed information, see section 16.

repeated exposure

Due to the physical form of the product it is not an aspiration hazard.

**Aspiration hazard Chronic effects** Prolonged and routine inhalation of high levels of respirable crystalline silica particles can lead to

the lung disease known as silicosis. Some studies show excess numbers of cases of

scleroderma, connective tissue disorders, lupus, rheumatoid arthritis, chronic kidney diseases and end-stage kidney disease in workers exposed to respirable crystalline silica. Pre-existing skin and respiratory conditions including dermatitis, asthma and chronic lung disease might be aggravated by exposure. Occupational exposure to respirable dust and respirable crystalline silica should be

monitored and controlled. May cause eczema-like skin disorders (dermatitis).

12. Ecological information

**Ecotoxicity** The product is not expected to be hazardous to the environment. Large amounts of the product

may affect the pH-factor in water with possible risk of harmful effects to aquatic organisms.

Components **Species Test Results** 

Calcium sulfate dihydrate (alternative CAS 10101-41-4) (CAS 13397-24-5)

Aquatic

Fish LC50 Fathead minnow (Pimephales promelas) > 1970 mg/l, 96 hours

Plaster of Paris (Calcium Sulfate Hemihydrate CAS 10034-76-1) (CAS 26499-65-0)

Aquatic

Fish LC50 Fathead minnow (Pimephales promelas) > 1970 mg/l, 96 hours

No data available. Persistence and degradability

**Bioaccumulative potential** Bioaccumulation is not expected.

Mobility in soil No data available. Other adverse effects None expected.

13. Disposal considerations

**Disposal instructions** Dispose in accordance with applicable federal, state, and local regulations. Recycle responsibly.

Local disposal regulations Dispose of in accordance with local regulations.

The waste code should be assigned in discussion between the user, the producer and the waste Hazardous waste code

disposal company.

Powerhold 650 NE Patch Plus SDS US Waste from residues / unused

products

Dispose of in accordance with local regulations.

Contaminated packaging

Dispose of in accordance with local regulations.

## 14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

**IMDG** 

Not regulated as dangerous goods.

Transport in bulk according to

Not applicable.

Annex II of MARPOL 73/78 and

the IBC Code

## 15. Regulatory information

**US** federal regulations

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication

Standard, 29 CFR 1910.1200.

## 16. Other information, including date of preparation or last revision

Issue date 09-October-2014

Revision date - 01

**Further information** 

Crystalline silica: Raw materials in this product may contain respirable crystalline silica. Exposures to respirable crystalline silica are not expected during the normal use of this product. However, actual levels must be determined by workplace hygiene testing. Prolonged and repeated exposure to airborne free respirable crystalline silica can result in lung disease (i.e., silicosis) and/or lung cancer.

Plaster of Paris: Is classified as a hazardous substance but is generally considered a safe material for routine use. When plaster of Paris is used responsibly it is not considered as a dangerous material. However, when mixed with water this product can become very hot. DO NOT attempt to make a cast enclosing any part of the body. Encasing any body part can cause serious burns and even amputation of the encased body part.

OSHA's "Preventing Skin Problems from Working with Portland Cement" provides excellent guidance and can be downloaded at: https://www.osha.gov/dsg/guidance/cement-guidance.html
