EYE	Flush eyes with generous quantities of water or eye rinse solution. Consult physician if irritation persists.				
SKIN	Use moisture renewing lotions if dryness occurs.				
NGESTION	Drink generous amounts of water to reduce bulk and drying effects.				
NHALATION	Remove to fresh air. Blow nose to evacuate dust.				
Most important symptoms/effects, acute and delayed	Dust may cause abrasive irritation to eyes. Prolonged skin contact may cause dryness. Dust may cause nose, throat and upper respiratory tract irritation. Prolonged inhalation of high concentration of dust may cause lung effects				
Indication of immediate medical attention and special treatment, if necessary	Immediate medical attention is not normally required. If dust irritates the eyes, seek medical attention.

RESPIRATORY PROTECTION  RESPIRATORY PROTECTION    pre: or h   filte   PEI   greater   pre: or h   pre:	Respirators fitted with filters certified to standard 42CFR84 under series N95 should be worn when dust is present. If the dust concentration is less than ten (10) times the Permissible Exposure Limit (PEL) use a quarter or half-mask respirator with a N95 dust filter or a single use dust mask rated N95. If dust concentration is greater than ten (10) times and less than fifty (50) times the PEL, a full-face piece respirator fitted with replaceable N95 filters is recommended. If dust concentration is greater than fifty (50) and less than two hundred (200) times the PEL use a power air-purifying (positive pressure) respirator with a replaceable N95 filter. If dust concentration is greater than two hundred (200) times the PEL use a type C, supplied air respirator (continuous flow, positive pressure), with full face piece, hood or helmet.				
GENERAL HYGIENE Avo	Avoid breathing dust. Avoid contact with eyes. Wash hands after handling and before eating or drinking.

SECTION 11: TOXICOL	OGICAL INFORMATIO	ON .			
POTENTIAL HEALTH EFFECTS	See below and Section 11 for additional information				
Likely Routes of Exposure	See below				
EYE	May cause irritation (tear formation and redness) if dust gets in eyes.				
SKIN	Not absorbed by the skin, but may cause dryness if prolonged exposure.				
INGESTION	Ingestion of small to moderate quantities is not considered harmful, but may cause irritation of the mouth, throa and stomach.				
INHALATION	Acute inhalation can cause dryness of the nasal passage and lung congestion, coughing and general throat irritation. Chronic inhalation of dust should be avoided.				
CHRONIC EFFECTS	Chronic inhalation of dust in excess of the Permissible Exposure Limit (PEL) established by OSHA over a prolonged number of years may cause lung changes.
