

# SAFETY DATA SHEET

## 1. PRODUCT AND COMPANY IDENTIFICATION

**Product Name:** Tech-rod® 122

**Product Size:** 1/8" (3.2 mm)

**Other means of identification**

**SDS number:** 200000001196

**Recommended use and restriction on use**

**Recommended use:** SMAW (Shielded Metal Arc Welding)

**Restrictions on use:** Not known. Read this SDS before using this product.

**Manufacturer/Importer/Supplier/Distributor Information**

<b>Company Name:</b>	The Lincoln Electric Company
<b>Address:</b>	22801 Saint Clair Avenue Cleveland, Ohio 44117
<b>Telephone:</b>	+1 (216) 481-8100
<b>Contact Person:</b>	Safety Data Sheet Questions: <a href="http://www.lincolnelectric.com/sds">www.lincolnelectric.com/sds</a> Arc Welding Safety Information: <a href="http://www.lincolnelectric.com/safety">www.lincolnelectric.com/safety</a>
<b>Company Name:</b>	The Lincoln Electric Company of Canada LP
<b>Address:</b>	179 Wicksteed Avenue Toronto, Ontario M4G 2B9
<b>Telephone:</b>	+1 (416) 421-2600
<b>Contact Person:</b>	Safety Data Sheet Questions: <a href="http://www.lincolnelectric.com/sds">www.lincolnelectric.com/sds</a> Arc Welding Safety Information: <a href="http://www.lincolnelectric.com/safety">www.lincolnelectric.com/safety</a>

**Emergency telephone number:**

<b>USA/Canada/Mexico</b>	+1 (888) 609-1762
<b>Americas/Europe</b>	+1 (216) 383-8962
<b>Asia Pacific</b>	+1 (216) 383-8966
<b>Middle East/Africa</b>	+1 (216) 383-8969

**3E Company Access Code:** 333988

## 2. HAZARDS IDENTIFICATION

Classified according to the criteria of the Globally Harmonized System of Classification and Labeling of Chemicals (GHS), The United States Occupational Safety and Health Administration's Hazard Communication Standard (29 CFR 1910.1200), Canada's Hazardous Product Regulations and Mexico's Harmonized System for the Identification and Communication of Hazards and Risks from Hazardous Chemicals in the Workplace.

**Hazard Classification** Not classified as hazardous according to applicable GHS hazard classification criteria.

**Label Elements**

<b>Hazard Symbol:</b>	No symbol
<b>Signal Word:</b>	No signal word.
<b>Hazard Statement:</b>	Not applicable
<b>Precautionary Statements:</b>	Not applicable

**Other hazards which do not result in GHS classification:**

Electrical Shock can kill. If welding must be performed in damp locations or with wet clothing, on metal structures or when in cramped positions such as sitting, kneeling or lying, or if there is a high risk of unavoidable or accidental contact with work piece, use the following equipment: Semiautomatic DC Welder, DC Manual (Stick) Welder, or AC Welder with Reduced Voltage Control.

Arc rays can injure eyes and burn skin. Welding arc and sparks can ignite combustibles and flammable materials. Overexposure to welding fumes and gases can be hazardous. Read and understand the manufacturer's instructions, Safety Data Sheets and the precautionary labels before using this product. Refer to Section 8.

**Substance(s) formed under the conditions of use:**

The welding fume produced from this welding electrode may contain the following constituent(s) and/or their complex metallic oxides as well as solid particles or other constituents from the consumables, base metal, or base metal coating not listed below:

Chemical Identity	CAS-No.
Carbon dioxide	124-38-9
Carbon monoxide	630-08-0
Nitrogen dioxide	10102-44-0
Ozone	10028-15-6
Manganese	7439-96-5
Chromium (VI)	18540-29-9
Nickel	7440-02-0
Chromium oxide	1308-38-9
Fluorides (as F)	16984-48-8

### 3. COMPOSITION / INFORMATION ON INGREDIENTS

**Reportable Hazardous Ingredients**

**Mixtures**

Chemical Identity	CAS number	Content in percent (%) <sup>*</sup>
Nickel	7440-02-0	20 - <50%
Chromium and chromium alloys or compounds (as Cr)	7440-47-3	10 - <20%
Titanium dioxide	13463-67-7	5 - <10%
Molybdenum	7439-98-7	5 - <10%
Limestone	1317-65-3	5 - <10%
Fluorides (as F)	16984-48-8	1 - <5%
Iron	7439-89-6	1 - <5%
Tungsten	7440-33-7	1 - <5%
Sodium silicate	1344-09-8	1 - <5%
Potassium oxide	12136-45-7	0.1 - <1%
Cobalt and compounds (as Co)	7440-48-4	0.1 - <1%
Manganese	7439-96-5	0.1 - <1%
Aluminum and/or aluminum alloys (as Al)	7429-90-5	0.1 - <1%
Bentonite	1302-78-9	0.1 - <1%
Chromium oxide	1308-38-9	0.1 - <1%
Potassium carbonate	584-08-7	0.1 - <1%

Quartz	14808-60-7	0.1 - <1%
Iron oxide	1309-37-1	0.1 - <1%
Copper and/or copper alloys and compounds (as Cu)	7440-50-8	0.1 - <1%

\* All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

#### Composition Comments:

The term "Hazardous Ingredients" should be interpreted as a term defined in Hazard Communication standards and does not necessarily imply the existence of a welding hazard. The product may contain additional non-hazardous ingredients or may form additional compounds under the condition of use. Refer to Sections 2 and 8 for more information.

### 4. FIRST AID MEASURES

#### Ingestion:

Unlikely due to form of product, except for granular materials. Avoid hand, clothing, food, and drink contact with metal fume or powder which can cause ingestion of particulate during hand to mouth activities such as drinking, eating, smoking, etc. If ingested, do not induce vomiting. Contact a poison control center. Unless the poison control center advises otherwise, wash out mouth thoroughly with water. If symptoms develop, seek medical attention at once.

#### Inhalation:

Move to fresh air if breathing is difficult. If breathing has stopped, perform artificial respiration and obtain medical assistance at once.

#### Skin Contact:

Remove contaminated clothing and wash the skin thoroughly with soap and water. For reddened or blistered skin, or thermal burns, obtain medical assistance at once.

#### Eye contact:

Dust or fume from this product should be flushed from the eyes with copious amounts of clean, tepid water until transported to an emergency medical facility. Do not allow victim to rub or keep eyes tightly closed. Obtain medical assistance at once.

Arc rays can injure eyes. If exposed to arc rays, move victim to dark room, remove contact lenses as necessary for treatment, cover eyes with a padded dressing and rest. Obtain medical assistance if symptoms persist.

#### Most important symptoms/effects, acute and delayed

##### Symptoms:

Short-term (acute) overexposure to fumes and gases from welding and allied processes may result in discomfort such as metal fume fever, dizziness, nausea, or dryness or irritation of nose, throat, or eyes. May aggravate pre-existing respiratory problems (e.g. asthma, emphysema). Long-term (chronic) overexposure to fumes and gases from welding and allied processes can lead to siderosis (iron deposits in lung), central nervous system effects, bronchitis and other pulmonary effects. Refer to Section 11 for more information.

##### Hazards:

Welding and allied process hazards are complex and may include physical and health hazards such as but not limited to electric shock, physical strains, radiation burns (eye flash), thermal burns due to hot metal or spatter and potential health effects of overexposure to welding fume or dust. Refer to Section 11 for more information.

#### Indication of immediate medical attention and special treatment needed

##### Treatment:

Treat symptomatically.

### 5. FIRE-FIGHTING MEASURES

<b>General Fire Hazards:</b>	As shipped, this product is nonflammable. However, welding arc and sparks can ignite combustibles and flammable products. Read and understand American National Standard Z49.1, "Safety In Welding, Cutting and Allied Processes" and National Fire Protection Association NFPA 51B, "Standard for Fire Prevention During Welding, Cutting and Other Hot Work" before using this product.
<b>Suitable (and unsuitable) extinguishing media</b>	
<b>Suitable extinguishing media:</b>	As shipped, the product will not burn. In case of fire in the surroundings: use appropriate extinguishing agent.
<b>Unsuitable extinguishing media:</b>	Do not use water jet as an extinguisher, as this will spread the fire.
<b>Specific hazards arising from the chemical:</b>	
<b>Special protective equipment and precautions for firefighters</b>	
<b>Special fire fighting procedures:</b>	Use standard firefighting procedures and consider the hazards of other involved materials.
<b>Special protective equipment for fire-fighters:</b>	Selection of respiratory protection for fire fighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

## 6. ACCIDENTAL RELEASE MEASURES

<b>Personal precautions, protective equipment and emergency procedures:</b>	If airborne dust and/or fume is present, use adequate engineering controls and, if needed, personal protection to prevent overexposure. Refer to recommendations in Section 8.
<b>Methods and material for containment and cleaning up:</b>	Absorb with sand or other inert absorbent. Stop the flow of material, if this is without risk. Clean up spills immediately, observing precautions in the personal protective equipment in Section 8. Avoid generating dust. Prevent product from entering any drains, sewers or water sources. Refer to Section 13 for proper disposal.
<b>Environmental Precautions:</b>	Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer. Environmental manager must be informed of all major spillages.

## 7. HANDLING AND STORAGE

<b>Precautions for safe handling:</b>	Prevent formation of dust. Provide appropriate exhaust ventilation at places where dust is formed.
	Read and understand the manufacturer's instruction and the precautionary label on the product. Refer to Lincoln Safety Publications at <a href="http://www.lincolnelectric.com/safety">www.lincolnelectric.com/safety</a> . See American National Standard Z49.1, "Safety In Welding, Cutting and Allied Processes" published by the American Welding Society, <a href="http://pubs.aws.org">http://pubs.aws.org</a> and OSHA Publication 2206 (29CFR1910), U.S. Government Printing Office, <a href="http://www.gpo.gov">www.gpo.gov</a> .
<b>Conditions for safe storage, including any incompatibilities:</b>	Store in closed original container in a dry place. Store in accordance with local/regional/national regulations. Store away from incompatible materials.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

### Control Parameters

**Occupational Exposure Limits: US**

Chemical Identity	type	Exposure Limit Values	Source
Nickel - Inhalable fraction.	TWA	1.5 mg/m3	US. ACGIH Threshold Limit Values (12 2010)
Nickel - as Ni	PEL	1 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
	REL	0.015 mg/m3	US. NIOSH: Pocket Guide to Chemical Hazards (2005)
Chromium and chromium alloys or compounds (as Cr) - as Cr	TWA	0.5 mg/m3	US. ACGIH Threshold Limit Values (12 2010)
	PEL	1 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
	REL	0.5 mg/m3	US. NIOSH: Pocket Guide to Chemical Hazards (2005)
Titanium dioxide	TWA	10 mg/m3	US. ACGIH Threshold Limit Values (12 2010)
Titanium dioxide - Total dust.	PEL	15 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
Molybdenum - Total dust. - as Mo	PEL	15 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
Molybdenum - Inhalable fraction. - as Mo	TWA	10 mg/m3	US. ACGIH Threshold Limit Values (03 2014)
Molybdenum - Respirable fraction. - as Mo	TWA	3 mg/m3	US. ACGIH Threshold Limit Values (03 2014)
Limestone - Total dust.	PEL	15 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
Limestone - Respirable fraction.	PEL	5 mg/m3	US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)
Limestone - Respirable.	REL	5 mg/m3	US. NIOSH: Pocket Guide to Chemical Hazards (2005)
Limestone - Total	REL	10 mg/m3	US. NIOSH: Pocket Guide to Chemical Hazards (2005)
Fluorides (as F) - as F	TWA	2.5 mg/m3	US. ACGIH Threshold Limit Values (12 2010)

**Appropriate Engineering Controls**

**Ventilation:** Use enough ventilation, local exhaust at the arc, or both to keep the fumes and gases from the worker's breathing zone and the general area. Train the welder to keep his head out of the fumes. **Keep exposure as low as possible.**

**Individual protection measures, such as personal protective equipment**
**General information:**
**Exposure Guidelines:** Threshold Limit Values (TLVs) and Biological

Exposure Indices (BEIs) are values published by the American Conference of Government Industrial Hygienists (ACGIH). ACGIH Statement of Positions Regarding the TLVs® and BEIs® states that the TLV-TWA should be used as a guide in the control of health hazards and should not be used to indicate a fine line between safe and dangerous exposures. See Section 10 for information on potential fume constituents of health interest. Threshold Limit Values are figures published by the American Conference of Government Industrial Hygienists.

**Maximum Fume Exposure Guideline™ (MFEG)™** for this product (based on content of Chromium (VI)) is 0.1 mg/m<sup>3</sup>. This exposure guideline is calculated using the most conservative value of the ACGIH TLV or OSHA PEL for the stated substance.

**Eye/face protection:**

Wear helmet or use face shield with filter lens shade number 12 or darker for open arc processes – or follow the recommendations as specified in ANSI Z49.1, Section 4, based on your process and settings. No specific lens shade recommendation for submerged arc or electroslag processes. Shield others by providing appropriate screens and flash goggles.

**Skin Protection****Hand Protection:**

Wear protective gloves. Suitable gloves can be recommended by the glove supplier.

**Other:**

**Protective Clothing:** Wear hand, head, and body protection which help to prevent injury from radiation, sparks and electrical shock. See Z49.1. At a minimum this includes welder's gloves and a protective face shield, and may include arm protectors, aprons, hats, shoulder protection, as well as dark substantial clothing. Wear dry gloves free of holes or split seams. Train the welder not to permit electrically live parts or electrodes to contact skin . . . or clothing or gloves if they are wet. Insulate yourself from the work piece and ground using dry plywood, rubber mats or other dry insulation.

**Respiratory Protection:**

Keep your head out of fumes. Use enough ventilation and local exhaust to keep fumes and gases from your breathing zone and the general area. An approved respirator should be used unless exposure assessments are below applicable exposure limits.

**Hygiene measures:**

Do not eat, drink or smoke when using the product. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Determine the composition and quantity of fumes and gases to which workers are exposed by taking an air sample from inside the welder's helmet if worn or in the worker's breathing zone. Improve ventilation if exposures are not below limits. See ANSI/AWS F1.1, F1.2, F1.3 and F1.5, available from the American Welding Society, [www.aws.org](http://www.aws.org).

**9. PHYSICAL AND CHEMICAL PROPERTIES**

<b>Appearance:</b>	Steel rod with extruded flux coating.
<b>Physical state:</b>	Solid
<b>Form:</b>	Solid
<b>Color:</b>	No data available.
<b>Odor:</b>	No data available.
<b>Odor threshold:</b>	No data available.
<b>pH:</b>	No data available.
<b>Melting point/freezing point:</b>	No data available.

<b>Initial boiling point and boiling range:</b>	No data available.
<b>Flash Point:</b>	No data available.
<b>Evaporation rate:</b>	No data available.
<b>Flammability (solid, gas):</b>	No data available.
<b>Upper/lower limit on flammability or explosive limits</b>	
<b>Flammability limit - upper (%):</b>	No data available.
<b>Flammability limit - lower (%):</b>	No data available.
<b>Explosive limit - upper (%):</b>	No data available.
<b>Explosive limit - lower (%):</b>	No data available.
<b>Vapor pressure:</b>	No data available.
<b>Vapor density:</b>	No data available.
<b>Density:</b>	No data available.
<b>Relative density:</b>	No data available.
<b>Solubility(ies)</b>	
<b>Solubility in water:</b>	No data available.
<b>Solubility (other):</b>	No data available.
<b>Partition coefficient (n-octanol/water):</b>	No data available.
<b>Auto-ignition temperature:</b>	No data available.
<b>Decomposition temperature:</b>	No data available.
<b>Viscosity:</b>	No data available.

## 10. STABILITY AND REACTIVITY

<b>Reactivity:</b>	The product is non-reactive under normal conditions of use, storage and transport.
<b>Chemical Stability:</b>	Material is stable under normal conditions.
<b>Possibility of hazardous reactions:</b>	None under normal conditions.
<b>Conditions to avoid:</b>	Avoid heat or contamination.
<b>Incompatible Materials:</b>	Strong acids. Strong oxidizing substances. Strong bases.
<b>Hazardous Decomposition Products:</b>	Fumes and gases from welding and allied processes cannot be classified simply. The composition and quantity of both are dependent upon the metal being welded, the process, procedure and electrodes used. Other conditions which also influence the composition and quantity of the fumes and gases to which workers may be exposed include: coatings on the metal being welded (such as paint, plating, or galvanizing), the number of welders and the volume of the worker area, the quality and amount of ventilation, the position of the welder's head with respect to the fume plume, as well as the presence of contaminants in the atmosphere (such as chlorinated hydrocarbon vapors from cleaning and degreasing activities.)
	When the electrode is consumed, the fume and gas decomposition products generated are different in percent and form from the ingredients listed in Section 3. Decomposition products of normal operation include those originating from the volatilization, reaction, or oxidation of the materials shown in Section 3, plus those from the base metal and coating, etc., as noted above. Reasonably expected fume constituents produced during arc welding include the oxides of iron, manganese and other metals

present in the welding consumable or base metal. Hexavalent chromium compounds may be in the welding fume of consumables or base metals which contain chromium. Gaseous and particulate fluoride may be in the welding fume of consumables which contain fluoride. Gaseous reaction products may include carbon monoxide and carbon dioxide. Ozone and nitrogen oxides may be formed by the radiation from the arc.

## 11. TOXICOLOGICAL INFORMATION

### Information on likely routes of exposure

#### Inhalation:

Potential chronic health hazards related to the use of welding consumables are most applicable to the inhalation route of exposure. Refer to Inhalation statements in Section 11.

#### Skin Contact:

Arc rays can burn skin. Skin cancer has been reported.

#### Eye contact:

Arc rays can injure eyes.

#### Ingestion:

Health injuries from ingestion are not known or expected under normal use.

### Symptoms related to the physical, chemical and toxicological characteristics

#### Inhalation:

Respiratory exposure to the crystalline silica present in this welding electrode is not anticipated during normal use. Respiratory overexposure to airborne crystalline silica is known to cause silicosis, a form of disabling pulmonary fibrosis which can be progressive and may lead to death. Crystalline silica is on the IARC (International Agency for Research on Cancer) and NTP (National Toxicology Program) lists as posing a cancer risk to humans. Short-term (acute) overexposure to fumes and gases from welding and allied processes may result in discomfort such as metal fume fever, dizziness, nausea, or dryness or irritation of nose, throat, or eyes. May aggravate pre-existing respiratory problems (e.g. asthma, emphysema). Long-term (chronic) overexposure to fumes and gases from welding and allied processes can lead to siderosis (iron deposits in lung), central nervous system effects, bronchitis and other pulmonary effects.

### Information on toxicological effects

#### Acute toxicity (list all possible routes of exposure)

##### Oral

**Other effects:** Organic polymers may be used in the manufacture of various welding consumables. Overexposure to their decomposition byproducts may result in a condition known as polymer fume fever. Polymer fume fever usually occurs within 4 to 8 hours of exposure with the presentation of flu like symptoms, including mild pulmonary irritation with or without an increase in body temperature. Signs of exposure can include an increase in white blood cell count. Resolution of symptoms typically occurs quickly, usually not lasting longer than 48 hours.

**Symptoms related to the physical, chemical and toxicological characteristics under the condition of use**

**Inhalation:**

**Specified substance(s):**

Manganese

Overexposure to manganese fumes may affect the brain and central nervous system, resulting in poor coordination, difficulty speaking, and arm or leg tremor. This condition can be irreversible.

Chromium (VI)

Chromates may cause ulceration, perforation of the nasal septum, and severe irritation of the bronchial tubes and lungs. Liver damage and allergic reactions, including skin rash, have been reported. Asthma has been reported in some sensitized individuals. Skin contact may result in irritation, ulceration, sensitization, and contact dermatitis. Chromates contain the hexavalent form of chromium. Hexavalent chromium and its compounds are on the IARC (International Agency for Research on Cancer) and NTP (National Toxicology Program) lists as posing a cancer risk to humans.

Nickel

Nickel and its compounds are on the IARC and NTP lists as posing respiratory cancer risk, and are skin sensitizers with symptoms ranging from slight itch to severe dermatitis.

**Additional toxicological Information under the conditions of use:**

**Acute toxicity**

**Oral**

**Specified substance(s):**

Chromium (VI)

LD 50 (Rat): 27 - 59 mg/kg

Fluorides (as F)

LD 50 (Rat): 4,250 mg/kg

**Inhalation**

**Specified substance(s):**

Carbon dioxide

LC Lo (Human, 5 min): 90000 ppm

Carbon monoxide

LC 50 (Rat, 4 h): 1,300 mg/l

Nitrogen dioxide

LC 50 (Rat, 4 h): 88 ppm

Ozone

LC Lo (Human, 30 min): 50 ppm

Chromium (VI)

LC 50 (Rat, 4 h): 33 - 70 mg/m<sup>3</sup>

**Carcinogenicity**

**IARC Monographs on the Evaluation of Carcinogenic Risks to Humans:**

**Specified substance(s):**

Chromium (VI)

Overall evaluation: 1. Carcinogenic to humans.

Nickel

Overall evaluation: 2B. Possibly carcinogenic to humans.

Chromium oxide

Overall evaluation: 3. Not classifiable as to carcinogenicity to humans.

**US. National Toxicology Program (NTP) Report on Carcinogens:**

**Specified substance(s):**

Chromium (VI)

Known To Be Human Carcinogen.

Nickel

Reasonably Anticipated to be a Human Carcinogen.

**US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050):**

**Specified substance(s):**

Chromium (VI)

Cancer

**Other effects:**

**Specified substance(s):**

Carbon dioxide	asphyxia
Carbon monoxide	Carboxyhemoglobinemia
Nitrogen dioxide	Lower Respiratory Tract irritation
Nickel	dermatitis pneumoconiosis

**Product:** No data available.

**Bioaccumulative Potential**
**Bioconcentration Factor (BCF)**
**Product:** No data available.

**Specified substance(s):**

Nickel	Zebra mussel ( <i>Dreissena polymorpha</i> ), Bioconcentration Factor (BCF): 5,000 - 10,000 (Lotic) Bioconcentration factor calculated using dry weight tissue conc
Cobalt and compounds (as Co)	Brown shrimp ( <i>Penaeus aztecus</i> ), Bioconcentration Factor (BCF): > 2,250 - < 2,500 (Static)
Copper and/or copper alloys and compounds (as Cu)	Blue-green algae ( <i>Anacystis nidulans</i> ), Bioconcentration Factor (BCF): 36.01 (Static)

**Mobility in Soil:**

No data available.

**13. DISPOSAL CONSIDERATIONS****General information:**

The generation of waste should be avoided or minimized whenever possible. When practical, recycle in an environmentally acceptable, regulatory compliant manner. Dispose of non-recyclable products in accordance with all applicable Federal, State, Provincial, and Local requirements.

**Disposal instructions:**

Disposal of this product may be regulated as a Hazardous Waste. The welding consumable and/or by-product from the welding process (including, but not limited to slag, dust, etc.) may contain levels of leachable heavy metals such as Barium or Chromium. Prior to disposal, a representative sample must be analyzed in accordance with US EPA's Toxicity Characteristic Leaching Procedure (TCLP) to determine if any constituents exist above regulated threshold levels. Discard any product, residue, disposable container, or liner in an environmentally acceptable manner according to Federal, State and Local Regulations.

**Contaminated Packaging:**

Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.

None present or none present in regulated quantities.

**CERCLA Hazardous Substance List (40 CFR 302.4):**

<u>Chemical Identity</u>	<u>Reportable quantity</u>
Nickel	100lbs.
Chromium and chromium alloys or compounds (as Cr)	5000lbs.
Cobalt and compounds (as Co)	Included in the regulation but with no data values. See regulation for further details.
Manganese	Included in the regulation but with no data values. See regulation for further details.
Chromium oxide	Included in the regulation but with no data values. See regulation for further details.
Copper and/or copper alloys and compounds (as Cu)	5000lbs.

**Superfund Amendments and Reauthorization Act of 1986 (SARA)**
**Hazard categories**

Not listed.

**SARA 302 Extremely Hazardous Substance**

None present or none present in regulated quantities.

**SARA 304 Emergency Release Notification**

<u>Chemical Identity</u>	<u>Reportable quantity</u>
Nickel	100 lbs.
Chromium and chromium alloys or compounds (as Cr)	5000 lbs.
Cobalt and compounds (as Co)	Included in the regulation but with no data values. See regulation for further details.
Manganese	Included in the regulation but with no data values. See regulation for further details.
Chromium oxide	Included in the regulation but with no data values. See regulation for further details.
Copper and/or copper alloys and compounds (as Cu)	5000 lbs.

**SARA 311/312 Hazardous Chemical**

<u>Chemical Identity</u>	<u>Threshold Planning Quantity</u>
Nickel	10000 lbs
Chromium and chromium alloys or compounds (as Cr)	10000 lbs
Titanium dioxide	10000 lbs
Molybdenum	10000 lbs
Limestone	10000 lbs
Fluorides (as F)	10000 lbs
Iron	10000 lbs
Tungsten	10000 lbs
Sodium silicate	10000 lbs
Potassium oxide	10000 lbs
Cobalt and compounds (as Co)	10000 lbs
Manganese	10000 lbs
Aluminum and/or aluminum alloys (as Al)	10000 lbs
Bentonite	10000 lbs
Chromium oxide	10000 lbs
Potassium carbonate	10000 lbs
Quartz	10000 lbs
Iron oxide	10000 lbs
Copper and/or copper alloys and compounds (as Cu)	10000 lbs

**SARA 313 (TRI Reporting)**

<u>Chemical Identity</u>	<u>Reporting threshold for other users</u>	<u>Reporting threshold for manufacturing and processing</u>
Nickel	10000 lbs	25000 lbs.
Chromium and chromium alloys or compounds (as Cr)	10000 lbs	25000 lbs.
Cobalt and compounds (as Co)	10000 lbs	25000 lbs.

**Clean Water Act Section 311 Hazardous Substances (40 CFR 117.3)**

None present or none present in regulated quantities.

**Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130):**

None present or none present in regulated quantities.

**US State Regulations**
**US. California Proposition 65**

This product contains chemical(s) known to the State of California to cause cancer and/or to cause birth defects or other reproductive harm.

Nickel	Carcinogenic.
Titanium dioxide	Carcinogenic.
Cobalt and compounds (as Co)	Carcinogenic.
Quartz	Carcinogenic.

**WARNING:** This product contains or produces a chemical known to the State of California to cause cancer and birth defects (or other reproductive harm). (California Health & Safety Code Section 25249.5 et seq.)

**US. New Jersey Worker and Community Right-to-Know Act**
**Chemical Identity**

Nickel
Chromium and chromium alloys or compounds (as Cr)
Titanium dioxide
Molybdenum
Limestone

Fluorides (as F)  
Tungsten  
Cobalt and compounds (as Co)  
Quartz

US. Massachusetts RTK - Substance List

## Chemical Identity

Nickel  
Chromium and chromium alloys or compounds (as Cr)  
Chromium oxide  
Quartz

US. Pennsylvania RTK - Hazardous Substances

## Chemical Identity

Nickel  
Chromium and chromium alloys or compounds (as Cr)  
Titanium dioxide  
Molybdenum  
Limestone  
Fluorides (as F)  
Tungsten

## US. Rhode Island RTK

No ingredient regulated by RI Right-to-Know Law present.

Canada Federal Regulations

## Canada Federal Regulations List of Toxic Substances (CEPA, Schedule 1)

### Not Regulated

Export Control List (CEPA 1999, Schedule 3)

## Not Regulated

National Pollutant Release Inventory (NPRI)

## **Canada. National Pollutant Release Inventory (NPRI) Substances, Part 5, VOCs with Additional Reporting Requirements**

## **Canada. Canadian Environmental Protection Act (CEPA). National Pollutant Release Inventory (NPRI) (Parts 1-4)**

(NPR) (Parts 1-4) Not Regulated

## Greenhouse Gases

## Chimouse Cases Not Regulated

## Controlled Drugs and Substances Act

Controlled Drugs and Substances Act

## Not Regulated

**Mexico. Substances subject to reporting for the pollutant release and transfer registry (PRTR): not applicable**

**Inventory Status:**

Australia AICS:	On or in compliance with the inventory
Canada DSL Inventory List:	One or more components are not listed or are exempt from listing.
EINECS, ELINCS or NLP:	On or in compliance with the inventory
Japan (ENCS) List:	One or more components are not listed or are exempt from listing.
China Inv. Existing Chemical Substances:	On or in compliance with the inventory
Korea Existing Chemicals Inv. (KECI):	On or in compliance with the inventory
Canada NDSL Inventory:	One or more components are not listed or are exempt from listing.
Philippines PICCS:	On or in compliance with the inventory
US TSCA Inventory:	On or in compliance with the inventory
New Zealand Inventory of Chemicals:	On or in compliance with the inventory
Japan ISHL Listing:	One or more components are not listed or are exempt from listing.
Japan Pharmacopoeia Listing:	One or more components are not listed or are exempt from listing.
Mexico INSQ:	One or more components are not listed or are exempt from listing.
Ontario Inventory:	One or more components are not listed or are exempt from listing.
Taiwan Chemical Substance Inventory:	One or more components are not listed or are exempt from listing.

**16. OTHER INFORMATION****Definitions:**

**The Maximum Fume Exposure Guideline™ (MFEG)™** is a guideline limit for total welding fume exposure for a specific consumable product which may be used by employers to manage worker exposure to welding fume where that product is used. The MFEG™ is an estimate of the level of total welding fume exposure for a given product above which the exposure limit for one of the fume constituents may be exceeded. The exposure limits referenced are the American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV®) and the U.S. OSHA Permissible Exposure Limit (PEL) whichever limit is lower. The MFEG™ never exceeds 5 mg/m<sup>3</sup> which is the maximum recommended exposure limit for total welding fume. **The MFEG™ is intended to serve as a general guideline to assist in the management of workplace exposure to welding fume and does not replace the regular measurement and analysis of worker exposure to individual welding fume constituents.**

**Revision Date:** 12/15/2016
