

1. PRODUCT AND COMPANY IDENTIFICATION

Company

Arkema Inc. 900 First Avenue King of Prussia, Pennsylvania 19406

Functional Additives

Customer Service Telephone Number:	(800) 331-7654 (Monday through Friday, 8:00 AM to 5:00 PM EST)
Emergency Information	
Transportation:	CHEMTREC: (800) 424-9300
Medical:	(24 hrs., 7 days a week) Rocky Mountain Poison Center: (866) 767-5089 (24 hrs., 7 days a week)
Product Information	
Product name: Synonyms: Molecular formula: Chemical family: Product use:	LUPEROX® DDM-9 DR Not available Complex mixture Organic peroxide - ketone peroxides initiator/catalyst

2. HAZARDS IDENTIFICATION

Emergency Overview

red
liquid
oily
sweet

*Classification of the substance or mixture:

Organic peroxides, Type D, H242 Inhalation: Acute toxicity, Category 4, H332 Skin corrosion, Category 1B, H314 Serious eye damage, Category 1, H318 Reproductive toxicity, Category 1B, H360 Chronic aquatic toxicity, Category 2, H411

*For the full text of the H-Statements mentioned in this Section, see Section 16.

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 1 / 23

- H242 : Heating may cause a fire. H314 : Causes severe skin burns and eye damage.
- H332 : Harmful if inhaled.
- H360 : May damage fertility or the unborn child.
- H411 : Toxic to aquatic life with long lasting effects.

Supplemental Hazard Statements: Organic peroxide.

Hazardous decomposition may occur.

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 2 / 23

LUPEROX® DDM-9 DR

Precautionary statements:

Prevention:

- P201 : Obtain special instructions before use.
- P202 : Do not handle until all safety precautions have been read and understood.
- P210 : Keep away from heat, sparks, open flames, hot surfaces. No smoking.
- P220 : Keep and Store away from clothing and combustible materials.
- P234 : Keep only in original container.
- P261 : Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.
- P264 : Wash skin thoroughly after handling.
- P271 : Use only outdoors or in a well-ventilated area.
- P273 : Avoid release to the environment.
- P280 : Wear protective gloves and protective clothing and eye protection and face protection.
- P281 : Use personal protective equipment as required.

Response:

P301 + P330 + P331 : IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303 + P361 + P353 : IF ON SKIN (or hair): Remove or take off immediately all contaminated clothing. Rinse skin with water and shower.

P304 + P340 : IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P305 + P351 + P338 : IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308 + P313 : IF exposed or concerned: Get medical advice/ attention.

- P310 : Immediately call a POISON CENTER or doctor.
- P363 : Wash contaminated clothing before reuse.

P391 : Collect spillage.

Storage:

P405 : Store locked up.
P410 : Protect from sunlight.
P411 + P235 : Maximum storage temperature is specified on label and in section 7 of SDS. Keep cool.
P420 : Store away from other materials.

Disposal:

P501 : Dispose of contents or container to an approved waste disposal plant.

Supplemental information:

Potential Health Effects:

If swallowed, may cause severe irritation and injury to the mouth, throat and digestive tract.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Version 2.3

Issued on: 02/08/2019

Page: 3 / 23

Chemical Name	CAS-No.	Wt/Wt	GHS Classification**
Propanoic acid, 2-methyl-, 2,2- dimethyl-1-(1-methylethyl)-1,3- propanediyl ester	6846-50-0	>= 57 - < 59 %	H412, H361
2-Butanone, peroxide	1338-23-4	>= 32 - < 34 %	H242, H302, H332, H314, H318
2,4-Pentanediol, 2-methyl-	107-41-5	>= 5.5 - < 6.5 %	H319
2-Butanone	78-93-3	>= 1 - < 2 %	H225, H319, H336

**For the full text of the H-Statements mentioned in this Section, see Section 16.

4. FIRST AID MEASURES

4.1. Description of necessary first-aid measures:

Inhalation:

If inhaled, remove to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Skin:

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean shoes before reuse.

Eyes:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Ingestion:

If swallowed, DO NOT induce vomiting. Get medical attention immediately. If victim is fully conscious, give a cupful of water. Never give anything by mouth to an unconscious person.

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 4 / 23

LUPEROX® DDM-9 DR

4.2. Most important symptoms/effects, acute and delayed:

For most important symptoms and effects (acute and delayed), see Section 2 (Hazard Statements and Supplemental Information if applicable) and Section 11 (Toxicology Information) of this SDS.

4.3. Indication of immediate medical attention and special treatment needed, if necessary:

Unless otherwise noted in Notes to Physician, no specific treatment noted; treat symptomatically.

Notes to physician:

Exposure to material may cause delayed lung injury resulting in pulmonary edema and pneumonitis. Exposed individuals should be monitored for 72 hours after exposure for the onset of delayed respiratory symptoms.

5. FIREFIGHTING MEASURES

Extinguishing media (suitable):

Water spray, Carbon dioxide (CO2), Foam, Dry chemical

Protective equipment:

Fire fighters and others who may be exposed to products of combustion should wear full fire fighting turn out gear (full Bunker Gear) and self-contained breathing apparatus (pressure demand / NIOSH approved or equivalent).

Further firefighting advice:

Fight fire with large amounts of water from a safe distance. Cool closed containers exposed to fire with water spray. Closed containers of this material may explode when subjected to heat from surrounding fire. After a fire, wait until the material has cooled to room temperature before initiating clean-up activities. Do not allow run-off from fire fighting to enter drains or water courses. Fire fighting equipment should be thoroughly decontaminated after use.

Fire and explosion hazards:

Contact with incompatible materials or exposure to temperatures exceeding the SADT may result in a self accelerating decomposition reaction with release of flammable vapors which may autoignite. When burned, the following hazardous products of combustion can occur: Carbon oxides

Hazardous organic compounds

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 5 / 23

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, Emergency procedures, Methods and materials for containment/clean-up:

Prevent further leakage or spillage if you can do so without risk. Evacuate area of all unnecessary personnel. Ventilate the area. Eliminate all ignition sources. Avoid generation of vapors. Contain and collect spillage with noncombustible absorbent material such as sodium bicarbonate, sodium carbonate, calcium carbonate, clean sand or non-acidic clay and then wet down (dampen) the mixture with water. DO NOT USE peat moss. DO NOT USE vermiculite. Sweep or scoop up using non-sparking tools and place into suitable properly labeled containers for prompt disposal. The sweepings should be wetted down further with water. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits.

Protective equipment:

Appropriate personal protective equipment is set forth in Section 8.

7. HANDLING AND STORAGE

Handling

General information on handling:

Contact with materials to avoid or exposure to temperatures exceeding the SADT may result in a self-accelerating decomposition reaction with release of flammable vapors which may autoignite.

Do not taste or swallow.

Do not get in eyes, on skin, or on clothing.

Do not breathe vapor or mist.

Keep away from heat, sparks and flames.

No smoking.

Use only with adequate ventilation.

Wash thoroughly after handling.

Prevent product contamination.

Keep container tightly closed and away from combustible materials.

Keep only in the original container.

Do not reuse container as it may retain hazardous product residue.

Emptied container retains vapor and product residue.

Container hazardous when empty.

Improper disposal or reuse of this container may be dangerous and/or illegal.

Storage

General information on storage conditions:

Keep in a dry, cool place. Segregated or detached storage is preferred. Store in well ventilated area away from heat and sources of ignition such as flame, sparks and static electricity. Store out of direct sunlight in a cool wellventilated place. Store in original container. Store in closed containers, in a secure area to prevent container damage and subsequent spillage. Store away from combustibles and materials to avoid. Refer also to National Fire Protection Association (NFPA) Code 400, Hazardous Materials Code.

Storage stability – Remarks:

Follow the recommended storage temperatures provided in this Section in order to maintain stability and oxygen content.

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 6 / 23

Storage incompatibility – General:

Store away from excessive heat, sources of ignition, and reactive materials. Store separate from: Strong acids Strong bases Strong oxidizing agents Reducing agents Accelerators Friedel - Crafts reaction catalyst transition metal salts metal ions Iron Copper Brass For all Organic Peroxides, compatible materials of contact are stainless steel 304 or 316 (preferred), high-density polyethylene (HDPE), polytetrafluoroethylene or glass linings.

Temperature tolerance – Do not store above:

100 °F (38 °C)

LUPEROX® DDM-9 DR

2-Pyrrolidinone, 1-methyl- (872-50-4)

US. OARS. WEELs Workplace Environmental Exposure Level Guide

Skin designation Remarks:	Can be absorbed through the skin.
Time weighted average	10 ppm (40 mg/m3)
Remarks:	Listed

Only those components with exposure limits are printed in this section. Limits with skin contact designation above have skin contact effect. Air sampling alone is insufficient to accurately quantitate exposure. Measures to prevent significant cutaneous absorption may be required. Limits with a sensitizer designation above mean that exposure to this material may cause allergic reactions.

Engineering controls:

Investigate engineering techniques to reduce exposures below airborne exposure limits or to otherwise reduce exposures. Provide ventilation if necessary to minimize exposures or to control exposure levels to below airborne exposure limits (if applicable see above). If practical, use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

Consult ACGIH ventilation manual or NFPA Standard 91 for design of exhaust systems.

Respiratory protection:

Do not breathe vapor or mist. Where airborne exposure is likely or airborne exposure limits are exceeded (if applicable, see above), use NIOSH approved respiratory protection equipment appropriate to the material and/or its components. Full facepiece equipment is recommended and, if used, replaces need for face shield and/or chemical goggles. Consult respirator manufacturer to determine appropriate type equipment for a given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where there may be a potential for significant exposure or where exposure limit may be significantly exceeded, use an approved full face positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply. Respiratory protection programs must comply with 29 CFR § 1910.134. (in case of higher concentration)

Skin protection:

Wear appropriate chemical resistant protective clothing and chemical resistant gloves to prevent skin contact. Consult glove manufacturer to determine appropriate type glove material for given application. Wear chemical goggles, a face shield, and chemical resistant clothing such as a rubber apron when splashing may occur. Rinse immediately if skin is contaminated. Remove contaminated clothing immediately and wash before reuse. Clean protective equipment before reuse. Provide a safety shower at any location where skin contact can occur. Wash thoroughly after handling.

Eye protection:

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 8 / 23

LUPEROX® DDM-9 DR

Where there is potential for eye contact, wear a face shield, chemical goggles, and have eye flushing equipment immediately available.

Page: 9 / 23

LUPEROX® DDM-9 DR

Temperature (SADT):

Thermal decomposition: Decomposes on heating.

Active oxygen content: 8.7 - 9.0 %

Flammability: See GHS Classification in Section 2 if applicable

10. STABILITY AND REACTIVITY

Stability:

This material is chemically unstable and should only be handled under specified conditions. See HANDLING AND STORAGE section of this MSDS for specified conditions.

Hazardous reactions:

Hazardous polymerization does not occur.

Materials to avoid:

Strong acids Strong bases Strong oxidizing agents Accelerators Reducing agents Friedel - Crafts reaction catalyst transition metal salts metal ions Iron Copper Brass For all Organic Peroxides, compatible materials of contact are stainless steel 304 or 316 (preferred), high-density polyethylene (HDPE), polytetrafluoroethylene or glass linings.

Conditions / hazards to avoid:

See HANDLING AND STORAGE section of this MSDS for specified conditions. SADT - Self Accelerating Decomposition Temperature. Lowest temperature at which the tested package size will undergo a self-accelerating decomposition reaction. This reaction will generate flammable vapors which may autoignite. The length of time to generate a decomposition reaction, after the SADT has been reached or exceeded, is dependent upon how much the SADT has been exceeded and the length of time needed for the reaction exotherm (heat spike from increasing decomposition rate) to initiate a rapid decomposition reaction. Typically, SADT is inversely proportional to package size. Larger packages will have a lower SADT due to smaller ratio to heat transfer area to volume of product.

Hazardous decomposition products:

Temperatures at or above SADT can result in the release of hazardous decomposition products which are flammable and may autoignite. Thermal decomposition giving flammable and toxic products : Carbon oxides Hazardous organic compounds

11. TOXICOLOGICAL INFORMATION

Product code: 117000

Version 2.3

Issued on: 02/08/2019

LUPEROX® DDM-9 DR

Data on this material and/or its components are summarized below.

Data for LUPEROX® DDM-9 DR

Acute toxicity

Oral: Acute toxicity estimate 3,040 mg/kg.

Dermal: Acute toxicity estimate > 5,000 mg/kg.

Inhalation: 4 h Acute toxicity estimate 4.54 mg/l. (dust/mist)

Data for Propanoic acid, 2-methyl-, 2,2-dimethyl-1-(1-methylethyl)-1,3-propanediyl ester (6846-50-0)

Acute toxicity

Oral: No deaths occurred. (rat) LD0 > 2,000 mg/kg.

Dermal: No deaths occurred. (rabbit) LD0 > 2,000 mg/kg.

Inhalation: No deaths occurred. (rat) 6 h LC0 > 5.3 mg/l. (saturated vapor)

Skin Irritation: Not irritating. (rabbit) (4 h)

Eye Irritation: Not irritating. (rabbit)

Skin Sensitization:

Not a sensitizer. Repeated skin exposure. (guinea pig) No skin allergy or irritation was observed.

Repeated dose toxicity

Subchronic dietary administration to rat / affected organ(s): kidney / signs: hyaline droplet nephropathy / (not considered relevant in humans)

Subchronic dietary administration to dog / No adverse systemic effects reported.

Genotoxicity

Assessment in Vitro: No genetic changes were observed in laboratory tests using: bacteria, animal cells

Developmental toxicity

Reproductive/Developmental Effects Screening Assay. dietary (rat) / Birth defects were observed.

Reproductive effects

Reproductive/Developmental Effects Screening Assay. dietary (rat) / At high dose : levels produced toxic effects in the mothers and offspring

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 11 / 23

LUPEROX® DDM-9 DR

Human experience

Skin contact:

No skin allergy was observed. (studied using human volunteers)

Data for 2-Butanone, peroxide (1338-23-4)

Acute toxicity

Oral:

Harmful if swallowed. (rat) LD50 = 1,017 mg/kg. (35 - 39 %) (In solution in Dimethyl phthalate)

Dermal:

May be harmful in contact with skin. (rabbit) LD50 = 4,000 mg/kg. (35 - 39 %) (In solution in Dimethyl phthalate)

Inhalation:

Harmful if inhaled. (rat) 4 h LC50 = 1.5 mg/l. (40 %) (dust/mist, data for a similar material)

Skin Irritation:

Causes severe skin burns. (rabbit) (4 h) (33 %) (occluded exposure, In solution in Dimethyl phthalate)

Eye Irritation:

Causes serious eye damage. (rabbit) (33 - 39 %) (In solution in Dimethyl phthalate)

Skin Sensitization:

Not a sensitizer. Guinea pig maximization test. No skin allergy was observed (40 %) (In solution in Dimethyl phthalate)

Repeated dose toxicity

Repeated oral administration to rat / affected organ(s): Stomach, liver / signs: Irritation of the gastric mucosa, increased organ weight

Subchronic oral administration to rat / No adverse systemic effects reported.

Genotoxicity

Assessment in Vitro:

No genetic changes were observed in laboratory tests using: bacteria, animal cells

Genotoxicity

Assessment in Vivo: No genetic changes were observed in laboratory tests using: mice

Developmental toxicity

Exposure during pregnancy. Oral (rat) / No birth defects were observed.

Reproductive effects

Reproductive/Developmental Effects Screening Assay. Oral (rat) / No toxicity to reproduction.

Human experience

Skin contact: No skin allergy was observed. (studied using human volunteers)

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 12 / 23

LUPEROX® DDM-9 DR

Skin allergy was observed. Isolated case reports after exposure to a mixture containing this substance.

Human experience

Eye contact:

Eyes: Pain, tearing, sensitivity to light, irritation. Mist and/or vapor are reported to cause irritation when proper industrial hygiene controls/procedures are not used. (based on reports of occupational exposure to workers) (severity of effects depends on extent of exposure)

Eyes: Pain, causes severe burns. (accidental exposure to concentrated solutions) (based on reports of occupational exposure to workers) (severity of effects depends on extent of exposure)

Human experience

Ingestion:

Esophagus: Severe irritation, burns. (accidental exposure to concentrated solutions)

Data for 2,4-Pentanediol, 2-methyl- (107-41-5)

Acute toxicity

Oral:

No deaths occurred. (rat) LD0 > 2,000 mg/kg. signs: GI tract irritation, central nervous system depression

Dermal:

No deaths occurred. (rat) LD0 > 2,000 mg/kg.

Inhalation:

No deaths occurred. (rat) 8 h LC0 = 0.34 mg/l. (saturated vapor)

Skin Irritation:

Practically non-irritating. (rabbit) (4 h)

Eye Irritation:

Causes serious eye irritation. (rabbit)

Skin Sensitization:

Not a sensitizer. Guinea pig maximization test. No skin allergy was observed

Repeated dose toxicity

Subchronic oral administration to rat / affected organ(s): kidney, liver, Stomach / signs: Irritation of the gastric mucosa / No significant impairment of function.

Repeated inhalation administration to rat / affected organ(s): upper respiratory tract / Local irritation (Aerosol)

Genotoxicity

Assessment in Vitro:

No genetic changes were observed in laboratory tests using: bacteria, animal cells

Developmental toxicity

Exposure during pregnancy. Oral (rat) / No birth defects were observed. (delays in development, at doses that

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 13 / 23

LUPEROX® DDM-9 DR

produce effects in mothers)

Reproductive effects

Reproductive/Developmental Effects Screening Assay. Oral (rat) / No toxicity to reproduction. At high dose : Effects on offspring / (increased mortality in the offspring, decreased growth rate)

Human experience

Inhalation:

Discomfort. (severity of effects depends on extent of exposure) (studied using human volunteers)

Human experience

Skin contact:

No skin allergy was observed. (studied using human volunteers)

Local irritation, redness, swelling. (subjects with dermatitis or eczema)

Central nervous system depression. (severity of effects depends on extent of exposure)

Human experience

Eye contact:

Discomfort, slightly irritating. (liquid or aerosol) (studied using human volunteers) (severity of effects depends on extent of exposure)

Data for 2-Butanone (78-93-3)

Acute toxicity

Oral:

May be harmful if swallowed. (rat) LD50 = 2,600 mg/kg.

Dermal:

Practically nontoxic. (rabbit) LD50 > 6,400 mg/kg.

Inhalation:

Practically nontoxic. (rat) 4 h LC50 = 34.5 mg/l. (vapor)

Specific target organ toxicity - single exposure:

May cause drowsiness or dizziness.

Skin Irritation:

Causes mild skin irritation. (rabbit) (24 h)

Eye Irritation:

Causes serious eye irritation. (rabbit) Draize Test 21/110.

Skin Sensitization:

Not a sensitizer. Buehler method. (guinea pig) No skin allergy was observed

Repeated dose toxicity

Subchronic inhalation administration to rat / affected organ(s): liver / signs: blood chemistry changes, changes in organ weights

Repeated inhalation administration to rat, mouse, cat, chicken / no nervous system injuries

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 14 / 23

LUPEROX® DDM-9 DR

Carcinogenicity

Chronic dermal application administration to mouse / No increase in tumor incidence was reported.

Genotoxicity

Assessment in Vitro:

No genetic changes were observed in laboratory tests using: bacteria, animal cells, human cells

Both positive and equivocal responses have been reported in tests using: yeast

Genotoxicity

Assessment in Vivo:

No genetic changes were observed in laboratory tests using: mice, hamster

Developmental toxicity

Exposure during pregnancy. inhalation (mouse) / No birth defects were observed. (skeletal variations, delays in development) Exposure during pregnancy. inhalation (rat) / No birth defects were observed. (delays in development, at doses that produce effects in mothers)

Reproductive effects

Reproduction test. drinking water (rat) / No toxicity to reproduction / (similar material)

Human experience

Inhalation:

Upper respiratory tract: irritation. (vapor)

Central nervous system: drowsiness, dizziness. Exposure to other materials makes the association questionable. (based on reports of occupational exposure to workers)

Nervous system: altered reflexes, changes in motor activity. Exposure to other materials makes the association questionable. (based on reports of occupational exposure to workers)

Human experience

Skin contact:

Skin: No skin allergy was observed. (studied using human volunteers)

Skin: dermatitis, cracking. Has a degreasing effect on the skin. (repeated or prolonged exposure)

Human experience

Eye contact: Eyes: irritating. (vapor)

Data for 2-Pyrrolidinone, 1-methyl- (872-50-4)

Acute toxicity

Oral: May be harmful if swallowed. (rat) LD50 = 4,150 mg/kg.

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 15 / 23

LUPEROX® DDM-9 DR

Dermal:

Practically nontoxic. (rat) LD50 > 5,000 mg/kg.

Inhalation:

Practically nontoxic. (rat) 4 h LC50 = 5.1 mg/l. (dust/mist)

Specific target organ toxicity - single exposure: May cause respiratory irritation.

Skin Irritation: Practically non-irritating. (rabbit) (24 h) (occluded exposure)

Eye Irritation: Causes serious eye irritation. (rabbit)

Skin Sensitization:

Not a sensitizer. Repeated skin exposure. (guinea pig) No skin allergy was observed

Repeated dose toxicity

Subchronic dietary administration to rat / signs: reduced body weight

Subchronic inhalation administration to rat / signs: reduced body weight

Repeated dermal administration to rabbit / signs: severe irritation

Carcinogenicity

Chronic inhalation administration to rat / No increase in tumor incidence was reported.

Chronic dietary administration to mouse / affected organ(s): liver / Increased incidence of tumors was reported. (not considered relevant to humans)

Chronic dietary administration to rat / No increase in tumor incidence was reported.

Genotoxicity

Assessment in Vitro:

Generally, no genetic changes were observed in laboratory studies using: bacteria, animal cells

Genotoxicity

Assessment in Vivo:

No genetic changes were observed in laboratory tests using: mouse, hamster

Developmental toxicity

Exposure during pregnancy. Oral (rabbit) / Birth defects were observed. (at doses that produce effects in mothers) Exposure during pregnancy. Oral (rat) / Toxic effects for foetal development Exposure during pregnancy. Inhalation (rat, rabbit) / No birth defects were observed.

Exposure during pregnancy. Dermal (rat) / Birth defects were observed. Toxic effects for foetal development (at doses that produce effects in mothers)

Reproductive effects

Two-generation study. oral (rat) / No toxicity to reproduction

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 16 / 23

LUPEROX® DDM-9 DR

Human experience

General:

Central nervous system effects: headache, nausea, dizziness, drowsiness, loss of consciousness.

Human experience Inhalation:

Upper respiratory tract: coughing, irritation, sneezing. (studied using human volunteers)

Human experience

Skin contact:

skin: dermatitis, blistering, cracking, swelling. (based on reports of occupational exposure to workers)

No skin allergy was observed.

Human experience

Eye contact:

Eye: irritating, visual disturbances. (based on reports of occupational exposure to workers)

12. ECOLOGICAL INFORMATION

Chemical Fate and Pathway

Data on this material and/or its components are summarized below.

Data for Propanoic acid, 2-methyl-, 2,2-dimethyl-1-(1-methylethyl)-1,3-propanediyl ester (6846-50-0)

Biodegradation:

Not readily biodegradable. (aerobic, 28 d) biodegradation 71 % / The 10 day time window criterion is not fulfilled.

Bioaccumulation:

= 195 (Lepomis macrochirus (Bluegill sunfish))

Octanol Water Partition Coefficient:

log Pow: = 4.04 - 4.91(Method: calculated)

Data for 2-Butanone, peroxide (1338-23-4)

Biodegradation:

Readily biodegradable. (28 d) biodegradation 87 % / OECD guideline 301D (Closed bottle test)

Octanol Water Partition Coefficient:

log Pow: < 2.04, at 77 °F (25 °C) (Method: OECD Test Guideline 117)

Data for 2,4-Pentanediol, 2-methyl- (107-41-5)

Biodegradation:

Readily biodegradable. (28 d) biodegradation 81 % / OECD Test Guideline 301 F

Octanol Water Partition Coefficient: log Pow: = -0.14(Method: calculated)

Data for 2-Butanone (78-93-3)

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 17 / 23

LUPEROX® DDM-9 DR

Biodegradation:

Readily biodegradable. (28 d) biodegradation 98 % / OECD Test Guideline 301 D

Octanol Water Partition Coefficient: log Pow: = 0.3

Photodegradation:

Half-life direct photolysis: = 6.9 d (is rapidly degraded in air by OH radicals.)

Ecotoxicology

Data on this material and/or its components are summarized below.

Data for Propanoic acid, 2-methyl-, 2,2-dimethyl-1-(1-methylethyl)-1,3-propanediyl ester (6846-50-0)

Aquatic toxicity data:

No effect up to the limit of solubility. Lepomis macrochirus (Bluegill sunfish) 96 h NOEC > 6 mg/l

Aquatic invertebrates:

No effect up to the limit of solubility. Daphnia magna (Water flea) 48 h EC50 > 1.46 mg/l

Algae:

No effect up to the limit of solubility. Pseudokirchneriella subcapitata (green algae) 72 h EC50 (growth rate) > 7.49 mg/l

Chronic toxicity to aquatic invertebrates:

Toxic. Daphnia magna (Water flea) 21 d NOEC (reproduction) = 0.7 mg/l

Chronic toxicity to aquatic plants:

Practically nontoxic. Pseudokirchneriella subcapitata (green algae) 72 h NOEC (growth rate) = 3.56 mg/l

Data for 2-Butanone, peroxide (1338-23-4)

Aquatic toxicity data:

Harmful. Poecilia reticulata (guppy) 96 h LC50 = 44.2 mg/l (In solution in Dimethyl phthalate)

Aquatic invertebrates:

Harmful. Daphnia (water flea) 48 h EC50 = 39 mg/l (In solution in Dimethyl phthalate)

Algae:

Toxic. Pseudokirchneriella subcapitata (green algae) 72 h ErC50 = 5.6 mg/l (In solution in Dimethyl phthalate)

Microorganisms:

Respiration inhibition / Activated sludge 30 min EC50 = 48 mg/l (In solution in Dimethyl phthalate)

Chronic toxicity to aquatic plants:

Pseudokirchneriella subcapitata (green algae) 72 h ErC10 2.1 mg/l

Data for 2,4-Pentanediol, 2-methyl- (107-41-5)

Aquatic toxicity data:

Practically nontoxic. Gambusia affinis (Mosquito fish) 96 h LC50 = 8,510 mg/l

Product code: 117000

Version 2.3

Issued on: 02/08/2019

Page: 18 / 23

LUPEROX® DDM-9 DR

Aquatic invertebrates:

Practically nontoxic. Daphnia magna (Water flea) 48 h EC50 = 5,410 mg/l

Algae:

Practically nontoxic. Selenastrum capricornutum 72 h EC50 > 429 mg/l

Microorganisms:

Practically nontoxic. Bacteria 10 d NOEC > 1,000 mg/l

Chronic toxicity to aquatic plants:

Practically nontoxic. Pseudokirchneriella subcapitata (green algae) 72 d NOEC = 429 mg/l

Data for 2-Butanone (78-93-3)

Aquatic toxicity data:

Practically nontoxic. Pimephales promelas (fathead minnow) 96 h LC50 = 3,200 mg/l

Aquatic invertebrates:

Practically nontoxic. Daphnia magna (Water flea) 48 h EC50 = 308 mg/l

Algae:

Practically nontoxic. Pseudokirchneriella subcapitata (green algae) 72 h EC50 = 1,972 mg/l

Microorganisms:

Pseudomonas putida 16 h Toxicity threshold = 1,150 mg/l

13. DISPOSAL CONSIDERATIONS

Waste disposal:

Dilution followed by incineration is the preferred method. Dilution ratio of 10:1 in a clean, compatible, combustible solvent (i.e., Fuel Oil #2, mineral oil) will reduce reactivity hazard during incineration and transportation. Dispose of in accordance with federal, state and local regulations. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits. Note: Chemical additions to, processing of, or otherwise altering this material may make this waste management information incomplete, inaccurate, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive or otherwise different from federal laws and regulations.

Take appropriate measures to prevent release to the environment.

16. OTHER INFORMATION

Full text of H-Statements referred to under sections 2 and 3.

- H225 Highly flammable liquid and vapour.
- H227 Combustible liquid.
- H242 Heating may cause a fire.
- H302 Harmful if swallowed.
- H314 Causes severe skin burns and eye damage.
- H318 Causes serious eye damage.
- H319 Causes serious eye irritation.
- H332 Harmful if inhaled.
- H335 May cause respiratory irritation.
- H336 May cause drowsiness or dizziness.
- H360 May damage fertility or the unborn child.
- H361 Suspected of damaging fertility or the unborn child.
- H411 Toxic to aquatic life with long lasting effects.
- H412 Harmful to aquatic life with long lasting effects.
