Section 6 Spill or Leak Procedures

Steps to Take in Case Material Is Released or Spilled:	<p>Exposure to the spilled material may be irritating or harmful. Follow personal protective equipment recommendations found in Section 8 of this SDS. Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill.</p> <p>No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this (M)SDS</p> <p>Ventilate the contaminated area. Evaporation of volatile substances can lead to the displacement of air creating an environment that can cause asphyxiation. Persons not wearing appropriate protective equipment should be excluded from area of spill until clean-up has been completed. Evacuate the area promptly.</p> <p>Shut off ignition sources; including electrical equipment and flames. Do not allow smoking in the area. Contain the discharged material. Use an inert absorbent such as sand or vermiculite. Place in properly labeled closed container.</p>
