

FILM KLEEN 7065

ANTISTATIC FILM CLEANER

DESCRIPTION:

FILM KLEEN 7065 is a blend of chemically-pure solvents that removes smudges, fingerprints, tape adhesives, dust, lint, and spots from all film and glass. It also contains antistatic compounds to prevent static which causes pinholes in film

FILM KLEEN 7065 will not harm or stratify non-diazo type film bases or emulsions. It dries fast and does not leave oily films, streaks, clouds or rings. It will not remove opaque. FILM KLEEN 7065 is used for cleaning and preparing film in the pre-press department before making plates. It is also used for cleaning glass in the pre-press department on stripping tables, vacuum frames, lenses and scanning equipment.

DIRECTIONS FOR USE:

Apply with clean soft, lintless cloth or disposable wipe saturated with FILM KLEEN 7065 and wipe clean with dry cheesecloth.

CAUTION: It is important that the applicator cloth or pad is totally saturated to avoid a dry portion of cloth creating a static spark. A spark can ignite the flammable vapors of the FILM KLEEN 7065. Do not soak film in FILM KLEEN 7065. Soaking may allow harmful penetration into emulsion layers.

READ MSDS BEFORE USE.

FEATURES AND BENEFITS:

- *Non-damaging – will not harm or stratify film bases or emulsions. Will not dissolve or remove water based opaque.
- *Antistatic – has special antistatic compounds. Ends pinholes caused by static charge.
- *Dries Fast – leaves no haze or residue.

SPECIFICATIONS:

Flashpoint: 10 degrees F

VOC's: 5.7 lb/gal (730 grams/liter) 100% acetone exempt

Drying Speed: Very fast

Odor: Mild Solvent

Composite Vapor Pressure (mmHG): 127

HMIS Rating:

Health: 2 Flammability: 3 Reactivity: 0 Personal Protection: B

PACKAGING:

6 x 1 gallon case, 5 gallon pails, 55 gallon drums

8/29/07

Excellence in Pressroom Chemistry
